Category 01: Sales & Cold Outreach

10 expert-level prompts that help you research prospects, write compelling outreach, handle objections, and close deals faster. Each prompt is designed to replace 1–2 hours of manual writing work.

Prompt 1: The Hyper-Personalized Cold Email

Title: *First-Line Hook Generator — Personalized at Scale*

Prompt

You are an expert B2B sales copywriter who specialises in cold email outreach with a 35%+ open rate and 8%+ reply rate. Your job is to write a hyper-personalised cold email for me.

Here is the context:

- My name: {your_full_name}
- My company: {your_company_name}
- What we do (one sentence): {your_value_proposition}
- Target prospect name: {prospect_name}
- Prospect's company: {prospect_company}
- Prospect's job title: {prospect_job_title}
- A specific thing I know about the prospect or their company (e.g. recent news, LinkedIn post, podcast appearance, company milestone): {personalization_detail}
- The main pain point we solve for someone in their role: {pain_point}
- The outcome/result our customers achieve (be specific with numbers if possible): {specific_result}
- Desired call to action: {cta – e.g. "15-minute call this week" or "Would it make sense to share a short case study?"}

Write a cold email that follows this structure:

1. A genuinely personalised opening line (2 sentences max) referencing {personalization_detail} – do NOT start with "I" and do NOT compliment them generically.
2. A single-sentence bridge that connects their world to the problem we solve.
3. A concise value statement (1-2 sentences) using the specific result above.
4. A low-friction call to action – one question, no pressure.
5. A professional sign-off.

Tone: Direct, conversational, confident – never salesy or sycophantic. Total length: 100-130 words. Subject line: write 3 options (curiosity-driven, result-driven, and ultra-short).

Example Output

Subject lines: - How {prospect_company} could cut onboarding time by 40% - Quick question about your sales ops - Saw your interview on SaaStr

Email:

Caught your SaaStr interview last week — your point about pipeline visibility being a lagging indicator rather than a leading one was spot on.

Most VP Sales at series B companies we talk to are flying blind until deal review on Fridays. By then, it's too late to coach reps on the deals that matter.

We helped Lattice's sales team reduce deal slippage by 34% in one quarter by surfacing risk signals 3 weeks earlier.

Worth a 15-minute chat to see if there's a fit?

Sarah Chen Head of Partnerships, Dealscope

Variations

Variation A — Trigger-Based (Company Just Raised Funding)

Change the personalization angle to reference a funding announcement. Replace {personalization_detail} with: "Saw that {prospect_company} just closed your Series B — congrats on the raise." Then frame the value proposition around scaling efficiently post-funding.

Variation B — Re-engagement (Gone Cold After 1 Touch)

Adapt the opening to acknowledge the silence humorously: "I know — another email from someone you don't know. Fair enough." Then tighten the body to a

single punchy paragraph and close with an easy opt-out: "If the timing is off, just say the word and I'll leave you alone."

Prompt 2: The LinkedIn Connection Request + Follow-Up Sequence

Title: *LinkedIn Outreach Sequence Builder (Connection → DM → Follow-Up)*

Prompt

You are a LinkedIn outreach expert who writes messages that feel human, relevant, and never spammy. Help me create a complete 3-step LinkedIn outreach sequence.

Context:

- My name: {your_name}
- My role: {your_role}
- My company and what it does: {company_and_description}
- Target persona (role + industry): {target_persona}
- Specific prospect for this sequence: {prospect_name}, {prospect_title} at {prospect_company}
- Why I am reaching out to THIS person specifically: {reason_for_outreach}
- The business problem I help solve: {problem_solved}
- A relevant proof point or case study: {social_proof}
- My ultimate goal: {goal – e.g. "book a discovery call" or "share a resource"}

Write the following:

****Step 1 – Connection Request Note**** (max 300 characters)

- Must feel personal and reference a specific reason for connecting
- No pitch in the connection request

****Step 2 – First DM after connection accepted**** (max 150 words)

- Send this 24-48 hours after connecting
- Soft open, no hard sell
- Mention their context, tease the value

****Step 3 – Follow-up if no reply after 5 days**** (max 100 words)

- Acknowledge they may be busy
- Add a new piece of value (stat, insight, or offer)
- Close with a different, lower-friction CTA than step 2

For each message, also provide: one line of coaching on why the message is structured that way.

Example Output

Step 1 — Connection Request (284 characters):

Hi Marcus — I came across your post on RevOps alignment and thought it was one of the clearest takes I'd seen. I work with revenue leaders navigating similar challenges and would love to connect.

Coaching: References a specific post (shows you're real), compliments the work not the person, no ask.

Step 2 — First DM:

Marcus, thanks for connecting. Your post on RevOps got me thinking — the friction between sales and finance at forecast time is something we hear constantly from CROs at growth-stage SaaS companies.

We built a tool that gives finance and sales a single source of truth on pipeline. Helped Carta's team cut their forecast prep from 3 hours to 20 minutes.

Not sure if it's relevant for your setup, but happy to share how they did it — would that be useful?

Coaching: Leads with their world, delivers one concrete proof point, closes with a soft yes/no question.

Step 3 — Follow-Up:

Hey Marcus — no worries if the timing isn't right. Thought you might find this useful regardless: [Link to article/resource]. If you ever want to compare notes on forecast accuracy, I'm here. No rush.

Coaching: Gives before asking, uses "no worries" to reduce pressure, leaves the door open without pestering.

Variations

Variation A — Warm Intro (Mutual Connection)

In Step 1, reference the mutual connection explicitly: "Hi {name} — {mutual_connection} suggested I reach out. We're both in {mutual_context}..." This triples the acceptance rate versus cold connection requests.

Variation B — Event-Based Outreach (Post-Conference)

If you both attended the same event, open with: "Great to be in the same room at {event_name} last week — I caught your question during the panel..." This creates instant shared context and dramatically warms the conversation.

Prompt 3: The Pain-Point Cold Calling Script

Title: *Cold Call Framework Builder — From Opening to Booked Meeting*

Prompt

You are a senior sales trainer who has coached over 200 SDRs and AEs. Write me a complete cold calling script that sounds natural —

not robotic or scripted – and handles the most common objections.

My details:

- My name: {your_name}
- Company: {company_name}
- Product/service: {product_or_service}
- Target prospect role: {prospect_role}
- Industry I'm calling into: {industry}
- The #1 problem my buyers face (be specific): {primary_pain_point}
- The result we deliver (with a number): {measurable_result}
- My desired outcome of the call: {desired_outcome – e.g. "book a 20-minute discovery call"}

Write the following sections:

1. **Opening (10 seconds):** Pattern interrupt – do NOT start with "How are you today?" Use a direct, respectful opener that establishes relevance immediately.
2. **Permission Statement:** A one-sentence ask for 27 seconds to explain why you're calling.
3. **Value Hook:** A 2-sentence statement connecting their likely pain to your result.
4. **Qualifying Question:** One open-ended question to get them talking.
5. **Objection Handling (write scripts for each):**
 - "I'm not interested"
 - "We already have a solution"
 - "Send me an email"
 - "I don't have time right now"
6. **Transition to Meeting Ask:** How to naturally pivot from conversation to booking.
7. **Close:** How to confirm the meeting with friction-reducing language.

Include timing notes for each section and a note on tone.

Example Output

1. Opening (10 sec):

"Hi {name}, this is Alex from Pipedata — I know you weren't expecting my call. I'll be quick."

Tone note: Calm, direct, confident. No uptalk.

2. Permission Statement:

"I work specifically with RevOps leaders at Series B SaaS companies — can I take 27 seconds to tell you why I'm calling?"

3. Value Hook:

"Most RevOps leads I speak with are spending 4–6 hours a week on manual pipeline reconciliation. We've built a way to cut that to under 30 minutes — and Intercom used it to reclaim 200+ hours per quarter."

4. Qualifying Question:

"Is that kind of manual reporting time something your team is dealing with too?"

5. Objection Handling:

"Not interested":

"That's fair — most people aren't until they see the numbers. Can I ask: is it the timing that's off, or is pipeline reporting genuinely not a pain point for you right now?"

"We have a solution":

"Good to know — a lot of our customers were using [competitor] before us. What made you choose it, and is it handling everything you need?"

"Send me an email":

"Happy to. So I don't waste your inbox, can I ask one quick question first — is manual pipeline reporting something that comes up in your weekly reviews?"

"No time right now":

"Completely understand. What's a better time — later this week or early next?"

6. Transition to Meeting:

"Based on what you're describing, it sounds like there could be a fit. I don't want to go deeper on the call — would a 20-minute screen share be worth it so you can see how Intercom's team set it up?"

7. Close:

"I have Thursday at 2pm or Friday at 10am — which works better? I'll send a calendar invite right now."

Variations

Variation A — Voicemail Script

Replace sections 4–7 with a 20-second voicemail: state your name, company, one-sentence hook, and a specific callback number. End with: "I'll also follow up by email so you have my info — speak soon."

Variation B — Gatekeeper Navigation Script

Add a pre-opener section for when a receptionist/EA answers. Focus on sounding like an expected, confident peer rather than a vendor. Example: "Hi — I'm trying to reach [name]. Is she available?" (Short, direct — no explaining yourself to the gatekeeper.)

Prompt 4: The Follow-Up Email Sequence (5-Touch Cadence)

Title: *Never-Ghosted Follow-Up Cadence Builder*

Prompt

You are a sales email strategist who specialises in follow-up sequences that convert without being annoying. Build me a 5-email follow-up cadence for a prospect who expressed initial interest but

went quiet.

Context:

- My company/product: {company_and_product}
- The prospect's name and title: {prospect_name}, {prospect_title}
- What the prospect said or did that showed interest:
{initial_interest_signal – e.g. "opened proposal", "replied to first email", "attended a webinar"}
- Time since last contact: {days_since_last_contact}
- The primary value prop I should reinforce: {value_proposition}
- A relevant case study or stat I can reference:
{case_study_or_stat}
- My CTA goal: {goal – e.g. "get back on a call" or "get a yes/no decision"}

Write all 5 emails following this cadence:

- Email 1 (Day 1 after going quiet): Gentle check-in, add value
- Email 2 (Day 4): New angle – address a likely objection proactively
- Email 3 (Day 9): Social proof nudge
- Email 4 (Day 14): The "should I close this?" email
- Email 5 (Day 21): Final breakup email with door left open

For each email:

- Subject line
- Full email body (60–100 words max)
- One-line strategy note explaining the psychology used

Keep the tone human, not automated. Vary the opening lines so no two emails start the same way.

Example Output

Email 1 — Day 1 (Gentle check-in) *Subject: Quick follow-up — anything I can clarify?*

Hi Priya,

Wanted to check in after sending over the proposal last week. I know these decisions take time, and I'm happy to answer any questions or walk through the numbers again if that's helpful.

Is there anything that would make this easier to move forward?

Best, James

Strategy: Non-pressuring, offer of help rather than push for decision.

Email 2 — Day 4 (Objection pre-emption) *Subject: One thing I should have mentioned*

Hi Priya,

I realised I didn't address something in our proposal that often comes up: implementation time. Most teams are live within 10 days — no dev resources needed on your side.

Worth a quick 10 minutes if that was a concern?

Strategy: Surfaces and resolves a likely hidden objection, gives them a reason to re-engage.

Email 3 — Day 9 (Social proof) *Subject: How Notion's RevOps team handled this*

Hi Priya,

Thought this might be relevant — Notion's RevOps lead had similar hesitation about switching tools mid-quarter. Here's how they handled it: {link or 1-sentence summary}.

Happy to connect you with their team if it would help.

Strategy: Peer-to-peer social proof reduces risk perception; offer of introduction is a high-trust gesture.

Email 4 — Day 14 (Decision nudge) *Subject: Should I close this out?*

Hey Priya — I don't want to keep cluttering your inbox. Should I take this off my list for now, or is there a better time to revisit?

Either answer works for me — just want to make sure I'm respecting your time.

Strategy: Direct permission question forces a response; removes pressure and respects autonomy.

Email 5 — Day 21 (Breakup) Subject: Closing the loop

Hi Priya,

I'll stop following up after this — I don't want to be a nuisance. If priorities shift and you want to revisit, my door's always open.

Wishing you and the team a strong Q3.

James

Strategy: Breakup emails paradoxically generate the highest reply rates — they trigger loss aversion and make you memorable as respectful.

Variations

Variation A — Inbound Lead Follow-Up

Use when a prospect filled out a form but never booked a call. Start Email 1 within 5 minutes of form submission. Lead with: "I saw you downloaded our [resource] — wanted to make sure you got what you were looking for."

Variation B — Post-Demo Follow-Up

Adjust cadence to start Day 0 (day of demo). Email 1 sends a recap of the demo with key takeaways personalised to what they discussed. Email 2 shares an ROI calculator. The urgency and specificity are higher because they've already invested time.

Prompt 5: The Prospect Research Brief

Title: 60-Second Prospect Intelligence Report Builder

Prompt

You are a sales intelligence analyst helping a B2B salesperson prepare for a high-stakes outreach or discovery call. Generate a structured prospect research brief that surfaces insights a seller can use to personalise their pitch and build instant rapport.

Input the following information:

- Prospect name: {prospect_name}
- Prospect's title: {prospect_title}
- Company name: {company_name}
- Company website: {company_website}
- Company size (employees/revenue if known): {company_size}
- Industry: {industry}
- Known recent news or events about the company: {recent_news – e.g. funding round, product launch, exec hire, earnings report}
- The prospect's LinkedIn URL or any posts/articles they've written: {linkedin_or_content}
- My product/service: {my_product_or_service}
- The core pain point I solve: {pain_point}

Generate the following brief sections:

****1. Company Snapshot (3 bullets)****

Key facts about the company relevant to my outreach – business model, growth stage, notable customers, tech stack hints.

****2. Prospect Profile (3 bullets)****

What their role likely entails day-to-day, what they likely care about, and what success looks like for them.

****3. Likely Pain Points (3 specific hypotheses)****

Based on their role, company stage, and industry, what are 3 problems they are probably experiencing right now that my product addresses?

****4. Conversation Starters (3 options)****

Opening lines or questions I can use on a call or in an email to demonstrate I've done my homework – each one referencing something specific about them.

****5. Risk Factors****

1-2 reasons this prospect might NOT buy, and how I should address them proactively.

****6. Recommended Approach****

One paragraph summarising the ideal angle for outreach – what to lead with, what to avoid, and what proof point will resonate most.

Example Output

Company Snapshot: - Fintech SaaS company, ~300 employees, Series C (\$45M raised Q4 2024). Focused on expense automation for mid-market CFOs. - Recent product launch (March 2025) expanded into AP automation — suggests aggressive growth mode and likely headcount pressure on their RevOps/finance ops team. - Notable customers include Gymshark and Typeform — brand-conscious buyers who care about case study credibility.

Prospect Profile: - As VP Revenue Operations, {prospect_name} owns the tech stack, process design, and forecast accuracy — reports to the CRO. - Day-to-day likely involves: weekly pipeline reviews, tool consolidation, CRM hygiene, and preparing board-level revenue forecasts. - Success metrics: forecast accuracy, quota attainment, and sales velocity.

Likely Pain Points: - Post-Series C, they're scaling headcount fast — onboarding reps into a fragmented stack causes ramp time to balloon. - Board reporting cadence has intensified — manual data pulls from multiple tools is a weekly time sink. - New AP automation product creates cross-sell motion they may not have a playbook for yet.

Conversation Starters: - *"I read about your AP automation launch — is RevOps now managing two separate GTM motions, or are you keeping it unified?"* - *"Your recent post on LinkedIn about forecast accuracy — do you use your CRM as the system of record for*

that, or a separate tool?" - "I noticed you expanded into AP automation last quarter. Does that change how your RevOps team structures territory or quota?"

Risk Factors: - Already has a RevOps tool in place (Clari or Gong likely) — position as complementary, not replacement. - May be in a budget freeze post-Series C hiring surge — lead with ROI and time-to-value.

Recommended Approach: Lead with the AP automation expansion as a conversation hook — it shows you've done homework and opens a strategic conversation rather than a tool demo. Anchor on forecast accuracy as the pain (VP RevOps language) and lead with the Typeform case study since they share a similar customer profile. Avoid leading with price or competitive comparisons — they're brand-conscious buyers.

Variations

Variation A — Account Planning for Enterprise

*Add a section: **Buying Committee Map** — identify the likely economic buyer, champion, technical evaluator, and legal/procurement gatekeeper based on typical org structures at companies of that size and industry.*

Variation B — Competitive Account Research

*Add a section: **Known Competitor Relationship** — based on their tech stack (check BuiltWith, G2 reviews, LinkedIn job postings), which competitor are they most likely using, and what are the top 3 complaints users have about that tool?*

Prompt 6: The ROI & Business Case Email

Title: Deal Accelerator — Custom ROI Email That Justifies the Budget Ask

Prompt

You are a strategic sales advisor helping a rep close a stalled deal by building a compelling business case in email format. The goal is to help the prospect justify the purchase internally to their CFO or budget committee.

Deal context:

- Product/solution name: {product_name}
- Annual contract value (ACV): {acv}
- Prospect name and title: {prospect_name}, {prospect_title}
- Prospect's company: {prospect_company}
- The prospect's stated pain point: {stated_pain_point}
- Estimated hours their team wastes per week on this problem: {hours_wasted_per_week}
- Average loaded hourly cost of the roles affected: {hourly_cost}
- Number of people on their team affected: {team_size}
- Our solution's proven outcome (with a metric): {proven_outcome}
- Comparable customer we can reference: {reference_customer}
- Implementation timeline: {implementation_timeline}
- Payback period we believe applies: {payback_period}

Write a business case email (150-200 words) that:

1. Opens with a brief acknowledgement of where we are in the conversation
2. Presents a simple cost-of-inaction calculation using the numbers above
3. Shows the expected ROI in Year 1 (return minus investment)
4. References the comparable customer
5. Offers to build a custom board-ready business case document if they want it
6. Closes with a specific next step

Also write: a 5-row ROI table the prospect can paste into a presentation to their CFO.

Tone: Professional, numbers-led, non-pushy. This email should feel like advice, not a sales pitch.

Example Output

Email:

Hi Natasha,

Following up on our conversation last week — I want to make sure you have everything you need to present this internally.

Here's a quick back-of-the-napkin calculation:

Your team of 12 spends roughly 5 hours/week on manual pipeline reconciliation. At an estimated \$75/hour blended rate, that's **\$234,000 in annual labour cost** — just for one process.

Our platform cuts that by ~80%, saving roughly \$187,000/year. At a \$48,000 ACV, you'd see payback in under 4 months, with a **290% Year 1 ROI**.

Lattice saw similar results and was live within 8 days — no dev resources required.

If it would help, I can build a fully formatted business case document your CFO can review directly. Happy to do that this week.

Would Thursday afternoon work for a 20-minute walkthrough?

Best, Daniel

ROI Table:

Metric	Current State With {Product} Saving		
Hours/week on reporting	60 hrs	12 hrs	48 hrs
Annual labour cost	\$234,000	\$46,800	\$187,200
Annual software cost	\$0	\$48,000	—
Net annual saving	—	—	\$139,200
Year 1 ROI	—	—	290%

Variations

Variation A — Verbal ROI for a Discovery Call

Convert this into a spoken script for a discovery call: "Can I share a quick number? Based on what you've described, I think you're leaving about \$X on the table every year. Want me to show you how I got there?"

Variation B — CFO One-Pager

Expand the email into a one-page PDF-ready business case with: Executive Summary, Problem Statement, Solution Overview, Financial Analysis, Implementation Timeline, and Risk Mitigation.

Prompt 7: The Objection Handler

Title: Sales Objection Reframe Engine — Turn "No" Into "Tell Me More"

Prompt

You are a world-class sales coach who has trained enterprise sales teams at companies like Salesforce, HubSpot, and Gong. Help me craft precise, empathetic, and effective responses to the most common sales objections I face.

My context:

- My product/service: {product_or_service}
- Average deal size: {deal_size}
- Sales cycle length: {sales_cycle}
- Target customer: {target_customer}
- My top 3 differentiators vs. competitors: {differentiators}
- A strong case study I can reference: {case_study}

For each of the following objections, write:

1. A 2-sentence empathetic acknowledgement (never dismissive, never "I understand, but...")
2. A reframe that shifts the conversation
3. A question to uncover the real concern behind the objection
4. A one-line close to advance the conversation

Objections to handle:

1. "Your price is too high."
2. "We're happy with our current solution."
3. "We don't have budget right now."
4. "We need to think about it."
5. "Can you send me more information?"
6. "We tried something similar and it didn't work."

7. "I need to talk to my boss/board first."
8. "Now isn't a good time – call me in 6 months."

After all objections, write a one-page "Objection Cheat Sheet" summary in table format for easy reference during calls.

Example Output

Objection 1: "Your price is too high."

Acknowledgement: "Price is always worth examining carefully — I'd push back on any vendor who didn't expect you to scrutinise it. You're absolutely right to make sure the investment is justified."

Reframe: "Most of our customers initially felt the same way — until we looked at the cost of *not* solving the problem. Can I share what we found when we ran that calculation for a company similar to yours?"

Discovery Question: "Is it the absolute price that concerns you, or is it uncertainty about whether the ROI is there?"

Advance: "If I could show you a scenario where this pays for itself in under 6 months, would that change the conversation?"

Objection 2: "We're happy with our current solution."

Acknowledgement: "That's genuinely good to hear — switching tools when things are working is the last thing any team needs."

Reframe: "I'm not here to convince you to switch. I'm curious what 'happy' looks like for you — because the teams I work with who were using [competitor] often didn't realise there was a gap until they saw a benchmark."

Discovery Question: "On a scale of 1–10, how confident are you in your current forecast accuracy — and what would a 10 look like?"

Advance: "Would you be open to a 20-minute comparison — just so you have a baseline? No commitment, no pitch."

(Responses for objections 3–8 follow the same format in the full output)

Objection Cheat Sheet:

Objection	Core Fear	Reframe Strategy	Key Question
Too expensive	Wasting money	Cost of inaction	ROI or risk?
Happy with current tool	Disruption/switching cost	Gap they haven't seen	What does "10/10" look like?
No budget	Risk of committing	Timing vs. priority	Budget or priority issue?
Need to think	Uncertainty/risk	Clarify what's unclear	What would make this a yes?
Send more info	Polite brush-off	Re-qualify interest	What's most relevant to you?
Tried it before	Past failure/skepticism	Understand what failed	What specifically didn't work?
Need boss approval	Risk of being wrong	Enable the champion	What does your boss care about most?
Call in 6 months	Timing/other priorities	Cost of waiting	What changes in 6 months?

Variations

Variation A — Written Objection Handling (Email)

Rewrite each response as an email reply rather than a spoken script. Emails need a subject line, shorter acknowledgement, and a concrete next step.

Variation B — Manager Coaching Card

Convert each objection handler into a roleplay card format for sales managers to use when coaching junior reps — including a "what good sounds like" vs. "common mistakes to avoid" column.

Prompt 8: The Case Study Reference Email

Title: *Social Proof Storyteller — Case Study Email That Converts Skeptics*

Prompt

You are an expert sales storyteller who knows how to use customer case studies to build trust and move deals forward without making the email feel like a marketing brochure.

Context:

- My product/service: {product_or_service}
- The case study customer: {reference_customer_name}
- The reference customer's industry: {reference_industry}
- The problem the reference customer had before: {before_state}
- What we did specifically: {solution_implemented}
- The measurable result (with numbers and timeframe):
{result_with_numbers}
- A direct quote from the customer (if available): {customer_quote}
– or write "generate a plausible quote"
- The prospect I'm sending this to: {prospect_name},
{prospect_title} at {prospect_company}
- Why this case study is relevant to this prospect:
{relevance_reason}
- My CTA: {cta}

Write a case study email that:

1. Opens with a hook that creates intrinsic relevance – why should THIS prospect care about THIS story
2. Tells the case study as a mini narrative (Problem → Solution → Result) in 4-6 sentences – no bullet points, no headers; just a clean story
3. Bridges from their story to the prospect's likely situation
4. Ends with a single, specific CTA

Tone: Warm and credible, like a trusted advisor sharing a relevant story — not a marketer running a campaign. Length: 120–160 words.

Also write: a 3-sentence LinkedIn DM version of the same story (max 300 characters).

Example Output

Email:

Hi Rahul,

Given that Revolut just expanded your compliance ops team, I thought you'd find this relevant.

Last year, a financial services company roughly your size was spending 11 hours per compliance cycle manually reconciling data across three internal systems. Reporting errors were surfacing in board reviews — which, as you can imagine, was not a good look for their CCO. We helped them consolidate into a single audit-ready dashboard in three weeks. They cut compliance reporting time by 67% and haven't had a board escalation since.

Your setup sounds similar based on what you mentioned about your current tooling. Would it be worth 20 minutes to see how they architected it?

Best, Meg

LinkedIn DM version:

Hi Rahul — thought of you when I looked at a case study from a fintech your size. They cut compliance reporting by 67% in 3 weeks. Would a quick look be useful?

Variations

Variation A — No Existing Case Study

Replace the reference customer section with a "results composite" based on average customer outcomes: "Across our fintech customers, the average reduction in compliance reporting time is 58% in the first quarter." Never invent a specific named customer.

Variation B — Peer Referral Ask

If the prospect and the case study customer know each other, add a line: "I checked with [customer name] and they'd be happy to take a 10-minute call if you'd like a first-hand perspective." This is the single highest-converting move in B2B sales.

Prompt 9: The Multi-Channel Outreach Sequence Planner

Title: Omnichannel Sales Sequence Architect (Email + LinkedIn + Phone + Video)

Prompt

You are a sales development expert who designs multi-channel outreach sequences for B2B SaaS companies. Build me a complete 10-touch, 21-day outreach sequence using email, LinkedIn, phone, and personalised video.

Context:

- My product: {product_name}
- Target persona: {persona_role} at {company_type} companies with {company_size} employees
- Industry focus: {industry}
- Primary pain point I solve: {pain_point}
- Key value proposition: {value_proposition}
- Measurable result I can promise: {measurable_result}
- Available proof points: {proof_points – e.g. case studies, awards, G2 rating}
- My name: {your_name}
- Desired outcome: {outcome – e.g. "book a 30-minute discovery

```
call"]}
```

Build the full 10-touch sequence with:

- Day number
- Channel (Email / LinkedIn / Phone / Video DM)
- Touch name / goal
- Full message or script (or detailed talking points for calls)
- Subject line (for emails)
- Duration or word count

Also write: a decision tree for handling the three most common early responses (interest, "not now", and "not the right person").

Example Output

Day	Channel	Touch	Goal
1	Email	Personalised cold email	First impression, hook
2	LinkedIn	Connection request	Build familiarity
4	LinkedIn DM	First message after connect	Soft value delivery
5	Phone	Cold call #1	Live conversation
7	Email	Case study email	Social proof
9	Video DM	Personalised 60-sec Loom	Pattern interrupt
11	Phone	Cold call #2	Follow-up on Loom
14	Email	Objection pre-emption email	Address likely concern
18	LinkedIn	Comment on their post	Non-sales touchpoint
21	Email	Breakup email	Force a decision

(Full scripts/messages for each touch are included in the complete output)

Decision Tree:

Response: "Interested – tell me more"

- Reply within 2 hours
- Send discovery call calendar link + 3-question pre-call form
- Day before call: send 1-page agenda

Response: "Not right now"

- Ask: "When would be a better time?" and calendar the follow-up
- Add to 90-day nurture sequence
- Send 1 value-add email per month (no pitch)

Response: "I'm not the right person"

- Ask: "Who would this be most relevant for?"
- Request warm intro or name
- Email new contact referencing the original conversation

Variations

Variation A — SMB Sequence (High Volume, Shorter Cycle)

Compress to a 5-touch, 10-day sequence. Remove video and reduce personalisation depth. Focus on email + phone only. Automate touches 1, 3, and 5.

Variation B — Enterprise Sequence (Long Cycle, Multiple Stakeholders)

Expand to 20 touches over 60 days. Add stakeholder-specific tracks for the economic buyer, technical evaluator, and user champion. Include an executive email track for C-level contacts.

Prompt 10: The Partnership & Co-Selling Outreach Email

Title: *Strategic Partnership Pitch Builder — Turning Vendors Into Revenue Channels*

Prompt

You are a business development strategist who specialises in crafting partnership proposals that open doors to channel revenue, co-selling arrangements, and integration partnerships. Write me an outreach email for a potential strategic partner.

Context:

- My company: {my_company_name}
- My product/service: {my_product}
- My target partner company: {partner_company}
- Why this partnership makes strategic sense: {strategic_rationale}
- The specific integration or collaboration I'm proposing: {partnership_type – e.g. "technology integration", "co-selling arrangement", "referral program", "joint go-to-market"}
- Shared customer profile: {shared_customer – who would benefit from both our products}
- What I bring to the partner (value for them): {value_for_partner}
- What I'd like from the partner: {value_for_me}
- Any existing connection or mutual context: {existing_connection – or "cold outreach"}
- The contact I'm emailing: {contact_name}, {contact_title}
- Desired next step: {next_step}

Write an outreach email that:

1. Opens with a credibility statement (who we are and why we're relevant to them)
2. Articulates the shared customer problem that makes this partnership logical
3. Makes the value exchange explicit – what's in it for them, what we're looking for
4. Proposes a specific, low-commitment next step
5. Keeps the entire email under 175 words

Tone: Peer-to-peer, strategic, confident. Not a vendor pitch – a business development conversation between equals.

Also write: a 45-second elevator pitch version of this partnership proposal for a chance encounter at a conference.

Example Output

Partnership Email:

Hi Jordan,

I'm the Head of BD at Stackform — we're a workflow automation platform used by 600+ B2B SaaS companies for post-sales operations.

A lot of our mutual customers — mid-market SaaS teams using your CS platform — run into the same gap: customer data lives in your product, but renewal workflows still happen in spreadsheets. The handoff between CS data and renewal execution is broken.

We've built a native integration that closes that gap. For your customers, it means automated renewal playbooks triggered by your health scores. For your team, it's a co-sell motion that directly ties your platform to revenue retention outcomes.

I think there's a clean partnership angle here. Would you be open to a 30-minute call with our partnership team to explore if it makes sense?

Best, Marco

Conference Elevator Pitch (45 sec):

"We're Stackform — we automate post-sales workflows for mid-market SaaS. We've actually been building a lot with CS platforms like yours because there's a gap between health scores and actual renewal execution that our customers keep running into. We've been thinking about a co-sell motion that could tie directly into your retention story. Worth grabbing 30 minutes at the conference or a quick call next week?"

Variations

Variation A — Reseller/Agency Partner Outreach

Adjust the value exchange section to focus on margin, certifications, and lead sharing. Replace "integration" framing with "service opportunity" for agencies. Example: "For your agency, this means a new recurring revenue stream — we pay 20% referral commission on ACV."

Variation B — Influencer/Thought Leader Partnership

Pivot from co-sell to content partnership. Lead with audience alignment: "Your audience of RevOps professionals maps almost exactly to our ICP." Propose a co-

authored piece, webinar, or newsletter swap rather than a commercial arrangement.

End of Category 01: Sales & Cold Outreach

Part of the "100 AI Mega Prompts for Business" digital product. *Categories include: Sales & Cold Outreach · Marketing Copy · Hiring & HR · Operations · Leadership & Strategy · Customer Success · Finance · Legal · Product · and more.*

Category 02: Content Creation & Repurposing

10 expert-level prompts *that help you create original content, transform existing assets into multiple formats, and build a consistent content engine — without starting from a blank page. Each prompt replaces 1–3 hours of writing work.*

Prompt 1: The Long-Form Blog Post Builder

Title: *Authority Article Architect — SEO-Optimised Long-Form Post from a Single Idea*

Prompt

You are a senior content strategist and SEO copywriter who writes long-form blog content for B2B companies. Your articles consistently rank on page one and drive qualified organic traffic.

Write a complete, publish-ready blog post based on the details below.

Context:

- Company name: {company_name}
- Industry/niche: {industry}
- Target audience: {target_audience – e.g. "VP of Marketing at SaaS companies with 50-500 employees"}
- Primary keyword to rank for: {primary_keyword}
- Secondary/LSI keywords to weave in naturally: {secondary_keywords}
- Article topic/working title: {article_topic}
- The main argument or thesis of the post: {core_thesis}
- Key points to cover (bullet list): {key_points}
- Any proprietary data, research, or examples I want to include: {proprietary_data}
- Competitors or thought leaders I want to differentiate from: {competitors_or_thought_leaders}
- Desired word count: {word_count – e.g. "1,800-2,200 words"}
- CTA at the end of the post: {cta – e.g. "Download the free template" or "Book a demo"}
- Brand voice (choose one or describe): {brand_voice – e.g. "Direct and data-driven, like HBR meets Gong"}

Write the full article including:

1. An SEO-optimised H1 title (include the primary keyword naturally)
2. A meta description (150-160 characters)
3. An opening hook (3-5 sentences) that creates urgency or challenges a common belief
4. All body sections with H2 and H3 subheadings
5. At least one data point, stat, or example per major section
6. A conclusion that summarises the argument and reinforces the CTA
7. Suggested internal links (placeholder text in [brackets])
8. A suggested featured image concept (one sentence)

Do not pad the article with filler. Every paragraph must earn its place.

Example Output

H1: Why Your Content Calendar Is the Reason Your Blog Isn't Growing

Meta description: A content calendar won't save a blog with the wrong strategy. Here's what high-growth SaaS companies do differently — and how to fix your approach in a week.

Opening hook: Most marketing teams treat their content calendar like a to-do list — fill the slots, hit publish, repeat. The problem is that consistent output without a coherent strategy is just noise at scale. If your blog has been live for 12 months and organic traffic is still flat, the calendar isn't the solution. The strategy is.

[H2] The Myth of Consistency Publishing twice a week feels productive. But analysis of 1,000 B2B blogs by Databox found that companies publishing fewer, longer-form posts drove 3x more organic traffic than those publishing short posts daily...

(Article continues through all sections with H2s, H3s, data points, and internal link suggestions)

CTA section: Ready to rebuild your content strategy from the ground up? Download our free Content ROI Audit template — used by 2,400+ marketers to identify exactly where their content is leaking traffic.

Featured image concept: Split-screen visual — a cluttered, colour-coded calendar on the left vs. a clean upward-trending traffic graph on the right.

Variations

Variation A — Thought Leadership Opinion Piece

Change the brief to: "Write this as a first-person opinion piece for publication on LinkedIn Articles or a guest post. Lead with a contrarian point of view. Use 'I' throughout. Aim for 900–1,100 words. No subheadings — use short paragraphs and white space instead."

Variation B — Data-Driven Research Post

Add to the brief: "Structure this as a data-driven 'State of [Industry]' post. Open with 5 headline statistics. Use H2 sections for each key finding. Include a methodology note. This will be used as a lead magnet and gated behind an email capture."

Prompt 2: The Content Repurposing Engine

Title: *One Piece, Ten Formats — Maximum Reach from a Single Asset*

Prompt

You are a content repurposing strategist who helps B2B companies extract maximum value from every piece of content they create. Your job is to take one source asset and transform it into 10 distinct content pieces for different channels – without the outputs feeling like copies of each other.

Source asset details:

- Type of original content: {content_type – e.g. "30-minute podcast episode", "2,000-word blog post", "60-minute webinar recording", "internal research report"}
- Topic/title of the original: {content_title}
- Core argument or key insight: {core_insight}
- Top 3-5 key points or takeaways: {key_takeaways}
- Any memorable quotes, stats, or examples from the original: {quotes_and_stats}
- Target audience: {target_audience}
- Channels I actively use: {channels – e.g. "LinkedIn, email newsletter, Twitter/X, YouTube Shorts, Instagram"}
- Brand voice: {brand_voice}
- Company name and product/service: {company_name_and_product}

Produce the following 10 repurposed assets:

1. LinkedIn long-form post (250-350 words, hook + insight + CTA)
2. Twitter/X thread (8-10 tweets, punchy and quotable)
3. Email newsletter section (150-200 words, conversational)
4. 3 standalone LinkedIn carousels – give me the slide titles and 1-sentence content for each slide
5. YouTube Shorts / Reels script (60 seconds, spoken word)
6. Quote graphic copy (5 pull quotes formatted for visual design)
7. Podcast episode description (for Spotify/Apple, 100 words, SEO-friendly)
8. A cold outreach icebreaker referencing this content (2 sentences)
9. An FAQ section (5 questions and answers this content could address)
10. A slide deck outline (8-10 slide titles with one-line descriptions)

For each output, note the ideal posting time and any platform-specific formatting tips.

Example Output

Source: 45-minute webinar on "Why Most SaaS Onboarding Fails in the First 7 Days"

1. LinkedIn Post:

We onboarded 10,000 users last year. 34% of them never came back after Day 3.

That's not a product problem. That's an onboarding problem — and it's more fixable than most teams think.

Last week I ran a live session breaking down the 4 moments where SaaS onboarding consistently breaks down. Here's what the data showed...

(Key insight 1) (Key insight 2) (Key insight 3)

The full recording is free to watch [link]. If you're losing users in the first week, this is 45 minutes worth carving out.

Post at: Tuesday or Wednesday, 8–9am in your audience's primary timezone.

2. Twitter/X Thread:

Tweet 1: We studied 10,000 SaaS onboarding flows. Here's why 34% of users ghost you before Day 7 — and the 4 fixes that actually work 🧵 *Tweet 2: Most teams blame churn on product. The data says otherwise. The drop-off happens before users even reach the "aha moment."* *Tweet 3: Fix #1: Your welcome email fires too late... (Thread continues for 8–10 tweets)*

3. Email Newsletter:

What I learned from 10,000 broken onboarding flows

I spent 45 minutes last week on a live webinar breaking down why SaaS users disappear in the first week — and I came away with one finding that genuinely surprised me...

(2–3 paragraphs of insight, conversational tone)

Watch the full session here → [link]

(Outputs 4–10 follow in the same structured format)

Variations

Variation A — Repurpose for a Specific Single Channel

Replace the 10-format output with a deep dive into one channel: "Take this source asset and generate 5 variations of LinkedIn content only — a long-form post, a carousel outline, a poll, a short punchy post (under 100 words), and a 'lessons learned' reflection post."

Variation B — Repurpose a Customer Success Story

Swap the source asset for a customer case study and add: "For every output, lead with the customer's result, not our product. The story is the hook. Our product is the vehicle."

Prompt 3: The LinkedIn Content Calendar

Title: *30-Day LinkedIn Content Plan Builder — Authority Posts That Attract Buyers*

Prompt

You are a LinkedIn content strategist who has helped B2B founders and executives grow from 0 to 50,000+ followers and generate inbound pipeline directly from organic content. Build me a complete 30-day LinkedIn content calendar.

My details:

- My name and role: {name_and_role}
- Company and what it does: {company_and_description}
- My target audience on LinkedIn (who I want to reach): {target_audience}
- My content goals (choose all that apply): {goals – e.g. "build personal brand", "generate inbound leads", "recruit talent", "establish thought leadership"}
- Topics I have genuine expertise in: {expertise_topics}
- Topics I want to be associated with: {aspirational_topics}
- My brand voice: {brand_voice}
- How many posts per week I can commit to: {posting_frequency – e.g. "3x per week"}
- Any content I already have that could be repurposed: {existing_content}
- Things I want to avoid (tone, topics, formats): {avoid}

Generate a 30-day calendar with the following for each post:

- Day and date
- Post format (e.g. text-only, carousel, poll, video script, image + caption)
- Post category (e.g. insight, story, data, hot take, behind-the-scenes, engagement bait)
- Hook (the first line – the most important part of any LinkedIn post)
- Content summary (2–4 sentences describing what the post covers)
- CTA (comment prompt, link, DM, follow)
- Estimated engagement type (comments, shares, profile visits, DMs)

After the calendar, write the full text of the 3 highest-potential posts in full.

Example Output

30-Day Calendar (excerpt):

Day	Format	Category	Hook	Summary	CTA	Expected Engagement
Day 1 (Mon)	Text-only	Hot take	"Your content strategy is backwards. Here's why."	Challenges the common advice to "post consistently" — argues that content without a POV is noise. Covers the 3 types of LinkedIn content that actually build pipeline.	"What's your biggest LinkedIn frustration? Drop it below."	High comments
Day 3 (Wed)	Carousel (8 slides)	Insight	"8 cold email subject lines that actually work (and why)"	Data-backed breakdown of subject line formulas with open rate benchmarks. Each slide = one formula with a real example.	"Save this for your next campaign."	High saves/shares
Day 5 (Fri)	Text-only	Story	"I lost a \$120k deal because of one email."	Personal story about a deal that fell apart due to a follow-up timing mistake. Lesson: the fortune is in the follow-up structure, not just persistence.	"Has this happened to you? I'd love to hear."	High comments

(Calendar continues for all 30 days)

Full Post #1 — Top Engagement Potential:

Your content strategy is backwards. Here's why.

Most B2B marketers are obsessed with consistency. Post 3x a week. Stay top of mind. Build the habit.

That advice is fine — if you have something to say.

The problem is that most LinkedIn content is consistent and forgettable. Same insights. Same formats. Same "here's what I learned" energy.

What actually builds pipeline on LinkedIn isn't frequency. It's having a point of view that makes your ideal customer think: "Finally, someone who gets it."

Here are the 3 types of posts that do that...

(Post continues)

Variations

Variation A — Executive Ghost-Writing Calendar

Add: "Write all posts in third-person voice initially, then convert to first-person for a C-suite executive who doesn't use jargon and prefers short sentences. Max 4 lines per paragraph."

Variation B — Company Page Calendar

Adjust the prompt to: "Build this calendar for a company LinkedIn page, not a personal profile. Shift from personal stories to company culture, customer wins, product education, and hiring posts. Keep tone institutional but human."

Prompt 4: The Email Newsletter Issue Writer

Title: *Newsletter Issue Builder — Curated, Opinionated, and Worth Opening Every Week*

Prompt

You are an expert newsletter writer and editor who has built several B2B newsletters with 20,000+ subscribers and open rates above 45%. Help me write a complete newsletter issue that readers look forward to and that builds genuine authority for my brand.

Newsletter details:

- Newsletter name: {newsletter_name}
- My name / brand: {author_name_or_brand}
- Target reader: {target_reader – describe their role, goals, and what they're trying to get better at}
- Newsletter positioning (what makes this newsletter different): {unique_angle}
- Issue theme or topic this week: {issue_theme}
- My original take or opinion on this topic: {my_take}
- 2-3 external resources, articles, or tools I want to reference: {resources}
- A personal anecdote or observation I can include: {personal_story}
- Any product/offer I want to mention (lightly – this is not a sales email): {soft_cta}
- Subscriber count and tone context: {subscriber_context – e.g. "3,000 subscribers, feel like I'm writing to a smart friend"}
- Approximate length target: {length – e.g. "600-800 words"}

Write the complete newsletter issue including:

1. Subject line (3 options: curiosity-led, benefit-led, ultra-short)
2. Preview text (45-65 characters)
3. Greeting (personalised, warm – not "Hi {first_name}")
4. Opening hook (challenge a belief or share a surprising observation)
5. Main body (your take + supporting ideas + resource references woven in naturally)
6. One practical takeaway the reader can implement today
7. A "this week's find" section (one tool, article, or insight – 2-3 sentences)
8. Sign-off (human, consistent with brand voice)

9. P.S. line (often the most-read line – use it for the soft CTA or a cliffhanger for next week)

Example Output

Subject lines: - *The productivity advice I stopped believing (and what I use instead) - How top operators think about deep work differently - Re: your calendar*

Preview text: Most time management advice makes things worse.

Issue:

Good morning —

Here's something I've noticed: the more productivity content someone consumes, the less productive they tend to be. Not because the advice is wrong — but because optimising a broken system just makes you a faster hamster on the same wheel.

This week I want to talk about something counterintuitive: the case for doing *less*, deliberately, as a growth strategy...

(Main body: 400–500 words covering the core argument, personal anecdote, and 2–3 woven-in references)

Your one takeaway this week: Audit your calendar for the past two weeks. Count how many meetings you attended where you were not the decision-maker and your presence changed nothing. Cancel one recurring meeting this week that fits that description.

This week's find: *Cal Newport's concept of "deep work scheduling" from his blog last week* — specifically his point that creative work doesn't require more time, it requires protected time. Worth 5 minutes: [\[link\]](#)

Speak next week, Jamie

P.S. Next issue I'm going to share the exact async communication template that eliminated 60% of our internal meetings. You won't want to miss it.

Variations

Variation A — Product-Led Newsletter (SaaS Company)

Shift the soft CTA to a customer spotlight: "Feature a customer use case as the main story. The product is present but never the hero — the customer's result is." This style converts 3–4x better than promotional newsletters.

Variation B — Curated Resource Newsletter

Replace the original take section with a structured curation format: "5 things worth your attention this week" — each item is a resource with a 2-sentence opinionated take on why it matters. Works well for time-poor audiences who want filtered signal.

Prompt 5: The YouTube Video Script

Title: *Video Script Architect — Scripted, Paced, and Built to Hold Attention*

Prompt

You are an expert YouTube scriptwriter who writes educational and thought leadership content for B2B creators. Your scripts consistently achieve watch times above 60% and generate comments, subscribers, and inbound leads. Write a complete, ready-to-record YouTube script.

Video details:

- Channel name and niche: {channel_name_and_niche}
- Target viewer: {target_viewer}
- Video topic: {video_topic}
- The core promise of this video (what will viewers be able to do or understand by the end): {core_promise}
- Key points to cover (3–5 main sections): {key_points}
- Any examples, case studies, or data to include:

{examples_and_data}

- Competitor videos on this topic I want to differentiate from (describe their approach): {competitor_approach}
- Target video length: {target_length – e.g. "10-14 minutes"}
- CTA at the end of the video: {cta – e.g. "Subscribe + comment your question" or "Link in description to free template"}
- On-screen graphics or B-roll cues needed: {visual_notes}
- Presenter's name: {presenter_name}

Write the full script including:

1. Hook (first 30 seconds – must earn the next 10 minutes; include a pattern interrupt)
2. Credibility statement (15 seconds – why should they trust you on this?)
3. What they'll learn (30-second roadmap – retain viewers by setting expectations)
4. Main content (all sections fully scripted, with [B-roll cue] and [GRAPHIC] notes)
5. Mid-video retention hook (at the ~50% mark – tease what's coming next)
6. Conclusion summary (60 seconds)
7. CTA delivery (natural, not robotic – written as the presenter would actually say it)

Also write: a video description (350-400 words, SEO-optimised), 10 tags, and 3 thumbnail concept ideas.

Example Output

[HOOK — 0:00–0:30] *(Camera tight on face, direct address)*

"Most people watching this video are about to make the same LinkedIn mistake that's quietly killing their content reach — and the frustrating thing is, it's not the algorithm. It's something completely in your control. Stay with me for the next 12 minutes and I'll show you exactly what it is and how to fix it."

[CREDIBILITY — 0:30–0:45]

"I've spent the last three years testing LinkedIn content strategies for B2B founders. I've run over 400 posts across 12 different industries, and I've distilled what actually works into what I'm about to share with you."

[ROADMAP — 0:45–1:15]

"Here's what we're covering today: first, the one structural mistake that limits your reach regardless of what you post. Second, the three content types that consistently outperform everything else for B2B audiences. And third, a repeatable posting framework you can start using tomorrow."

[SECTION 1 — 1:15–4:00]

(GRAPHIC: show LinkedIn algorithm diagram) "Let's start with the reach killer. LinkedIn's algorithm does something most people don't realise — it runs a 60-minute 'golden window' test on every post..."

(Script continues through all sections with full dialogue, B-roll cues, and graphics notes)

Video Description (excerpt):

In this video, I break down the single structural mistake that limits LinkedIn reach for 90% of B2B content creators — and share the exact 3-post framework I use to consistently generate inbound leads from organic content.

Whether you're a founder, executive, or marketing professional, this framework works regardless of your follower count.

Timestamps: 0:00 – The mistake most people make 1:15 – Why LinkedIn suppresses your posts ...

Tags: LinkedIn content strategy, B2B LinkedIn, LinkedIn algorithm 2025, LinkedIn for founders...

Thumbnail concepts: 1. Split face — shocked expression on left / upward graph on right. Text: "Why Your Posts Get 0 Reach" 2. Bold text on dark background: "The Algorithm Secret No One Talks About" + small headshot 3. Before/after: small number (47 views) → large number (22,000 views), presenter pointing at the difference

Variations

Variation A — Short-Form Video Script (60–90 seconds for Reels/Shorts)

Compress the structure to: Hook (5 sec) → Core insight (40 sec) → Takeaway (10 sec) → CTA (5 sec). No roadmap section. Every sentence must be 15 words or fewer. Cut anything that can be cut.

Variation B — Webinar Presentation Script

Expand the structure to include: Welcome/housekeeping (2 min), host credibility (3 min), problem framing (10 min), solution walkthrough (25 min), live Q&A prompts (10 min), and offer/CTA (5 min). Add slide transition notes.

Prompt 6: The Podcast Episode Outline & Show Notes

Title: *Podcast Producer — Episode Outline, Interview Questions, and Full Show Notes*

Prompt

You are an experienced podcast producer and show notes writer who helps B2B podcasts grow their audience, rank in search, and convert listeners into leads. Help me prepare for and publish a complete podcast episode.

Episode details:

- Podcast name and niche: {podcast_name_and_niche}
- Episode topic: {episode_topic}
- Guest name and title (or "solo episode"): {guest_name_and_title}
- Guest's background and expertise: {guest_background}
- Why this topic is relevant to my audience right now: {relevance}
- My audience's top 3 frustrations or questions related to this topic: {audience_questions}
- Key insights I want to make sure we cover: {key_insights}

- Any prior content the guest has published that I should reference: {guest_prior_content}
- Episode length target: {episode_length – e.g. "40-55 minutes"}
- Podcast CTA: {cta – e.g. "subscribe and leave a review" or "download the guide at [URL]"}

Generate the following:

****Part 1 – Pre-Interview Prep****

- 5 warm-up questions to build rapport before recording
- 15 substantive interview questions (grouped by theme: background, insight, tactical, forward-looking, rapid-fire)
- 3 follow-up probes to use if an answer needs deepening

****Part 2 – Episode Structure****

- Recommended episode arc with timing (e.g. "0:00-5:00 Intro and guest background")
- 2 suggested teaser clips (timestamp moments to pull for social promotion)

****Part 3 – Show Notes (publish-ready)****

- Episode title (SEO-optimised, 60 characters max)
- Episode description (200-250 words, includes keywords naturally)
- Key takeaways (5 bullet points)
- Timestamps/chapters
- Guest bio (100 words)
- Resources mentioned
- Transcript-ready summary paragraph

Example Output

Part 1 — Interview Questions (excerpt):

Warm-up:

"Before we hit record properly — what's something you're genuinely excited about right now, work or otherwise?"

Substantive — Background theme:

"You've spent 12 years inside RevOps at hyper-growth companies. What's the misconception about the role that you'd most like to correct?"

Tactical theme:

"Walk me through how you'd set up a RevOps function from scratch at a Series B company with no existing infrastructure. Where do you start?"

Follow-up probe:

"That's interesting — can you give me a specific example of when that went wrong and what you'd do differently?"

Part 2 — Episode Arc: - 0:00–2:00 — Intro + hook (tease the counterintuitive insight) - 2:00–8:00 — Guest background (keep it tight — max 6 minutes) - 8:00–22:00 — Core insight section: the problem with how most companies set up RevOps - 22:00–38:00 — Tactical deep dive: frameworks and tools - 38:00–48:00 — Forward-looking: where the discipline is going - 48:00–52:00 — Rapid fire + sign-off - 52:00–55:00 — Host outro + CTA

Suggested social clips: - Clip 1: ~22:00 mark — guest's "aha moment" story about forecast accuracy - Clip 2: ~38:00 mark — tactical answer on tech stack decisions

Part 3 — Show Notes:

Title: Why Your RevOps Function Is Set Up Backwards — with Alex Rubin

Description: Most companies build RevOps reactively — hiring a coordinator when the CRM breaks down and promoting them when things get busy. According to Alex Rubin, 12-year RevOps veteran and current VP Ops at Scalepoint, that's the #1 reason revenue teams plateau...

(Description continues for 200–250 words with natural keyword inclusion)

Variations

Variation A — Solo Episode (No Guest)

Replace the interview questions section with: "Write a complete solo episode monologue outline with talking points, transitions, and a storytelling arc. Include 2 personal examples I can slot into {example_placeholder} spots."

Variation B — Roundtable Episode (Multiple Guests)

Adjust the structure to: "Write a facilitator guide for a 3-guest roundtable discussion. Include 5 shared questions for the group, 2 questions directed at each individual guest, and guidance on managing airtime and avoiding crosstalk."

Prompt 7: The Social Media Caption Batch

Title: *Caption Factory — 30 Platform-Native Captions from One Content Theme*

Prompt

You are a social media copywriter who specialises in platform-native content for B2B brands. You understand that what works on LinkedIn fails on Instagram and what works on Twitter/X dies on Facebook. Write a batch of social media captions from a single content theme, each optimised for its specific platform.

Context:

- Brand name: {brand_name}
- Industry and product/service: {industry_and_product}
- Target audience: {target_audience}
- Content theme or topic this batch covers: {content_theme}
- Core message I want to communicate: {core_message}
- Key stat, insight, or hook I can use across formats: {key_hook}
- Brand voice (e.g. professional, witty, bold, warm): {brand_voice}
- Brand's CTA or link for this campaign: {cta_and_link}

Write 5 caption variations for each of the following platforms (25 captions total):

****LinkedIn (business professional audience)****

- 1x long-form post (250–350 words, paragraph format, no hashtag spam)
- 1x short punchy post (under 80 words)
- 1x question/poll caption
- 1x "unpopular opinion" post
- 1x behind-the-scenes or culture post

****Twitter/X (concise, punchy, conversation-starting)****

- 1x standalone tweet (under 240 characters)
- 1x thread starter (first tweet only – make them want to click "read more")
- 1x reply bait tweet (designed to spark disagreement or discussion)
- 1x quote/insight tweet (formatted for screenshotting and sharing)
- 1x CTA tweet (link-forward)

****Instagram (visual-first, save-worthy)****

- 1x carousel caption (intro + 3 slide titles + CTA)
- 1x Reels caption (short, punchy, emoji-light)
- 1x story CTA caption (for a swipe-up or link sticker)
- 1x inspirational/motivational caption
- 1x community engagement caption (question-led)

For each caption, add one line of platform-specific formatting advice.

Example Output

LinkedIn — Long-form post:

Nobody asked for another blog post about content marketing.

So I'm not writing one.

Instead, here's what actually changed our content performance this quarter — and it had nothing to do with posting frequency, format testing, or hiring a better writer.

We stopped trying to reach everyone and started writing for exactly 47 people.

Specifically: the 47 VP Marketing contacts in our CRM who had opened at least 3 of our emails but never booked a call. We wrote content that answered the exact

questions they were asking in those email replies. We addressed the objections we'd heard on discovery calls. We used their language, not ours.

Organic traffic was a side effect. Pipeline was the goal.

In 90 days, 11 of those 47 booked demos. Our content hadn't changed in quality. The intent behind it had.

If you're measuring your content by traffic alone, you're measuring the wrong thing.

Formatting note: No hashtags needed on long-form LinkedIn posts — they dilute the read. Add one at the very end if you must.

Twitter/X — Reply bait:

Hot take: most B2B content teams would generate more pipeline if they cut their output by 60% and spent the time on distribution instead.

Disagree? Tell me why.

Formatting note: End with a direct challenge — it outperforms questions every time on Twitter/X.

Instagram — Carousel caption:

The content strategy shift that changed everything 📌

Slide 1: Stop trying to reach everyone Slide 2: Write for your 50 most important prospects Slide 3: Use their words, not yours CTA: Save this if you're rethinking your content approach.

Formatting note: Lead with a downward emoji or "tap through" language — it signals there's more to see.

Variations

Variation A — Product Launch Caption Batch

Change the content theme to a specific product launch or feature release. Add: "For each platform, one caption must focus on social proof (customer quote or result), and one must address the most common objection to buying."

Variation B — Event or Conference Caption Batch

Adjust to a live event context: "Write 5 captions per platform timed to: pre-event hype (1 week out), day-of live coverage (2 captions), post-event recap, and evergreen content from the event's key insight."

Prompt 8: The Case Study Content Builder

Title: *Customer Story Machine — Turn a Win Into a Multi-Format Content Asset*

Prompt

You are a B2B content marketer who specialises in writing customer case studies that serve two purposes simultaneously: they close deals in the sales cycle AND they build credibility in content marketing. Help me turn a customer win into a complete content asset suite.

Customer win details:

- Customer company name (or use "a {industry} company" if anonymising): {customer_name}

- Customer's industry and size: {customer_industry_and_size}
- The person we worked with (name and title, optional): {customer_contact}
- The problem they had before working with us: {before_state – be specific}
- What they tried before finding us (and why it failed): {previous_attempts}
- What we did specifically (the solution, implementation approach): {solution}
- The measurable result (numbers, timeframe, before vs. after): {result}
- A direct quote from the customer (or "create a plausible representative quote"): {customer_quote}
- The emotional/qualitative benefit beyond the numbers: {qualitative_benefit}
- How long they've been a customer: {tenure}

Generate the following content suite:

1. **Full case study** (600–800 words, narrative format: Challenge → Approach → Results → What's Next)
2. **1-page PDF summary** (structured layout: headline stat, 3 bullet results, quote, 3-section body, CTA)
3. **Sales email featuring this story** (120 words, designed to send mid-deal to a hesitant prospect)
4. **LinkedIn post version** (200–250 words, first-person from my brand's voice)
5. **Testimonial pull quotes** (5 variations of varying length for use on website/sales decks)
6. **Cold outreach personalisation line** (2 sentences referencing this case study as a hook)
7. **Slide deck summary** (5 slide titles + one-line content description per slide)

Example Output

Full Case Study Opening:

How Lattice Cut Sales Forecast Prep Time by 67% in One Quarter

Lattice's RevOps team was losing 12 hours every week to a process that should have taken 2. Here's how they fixed it — and what changed when they did.

The Challenge

When Danielle Moreau joined Lattice as VP Revenue Operations in early 2024, she inherited a forecasting process built on a patchwork of Salesforce exports, manual spreadsheets, and a weekly 3-hour sync that nobody looked forward to.

"We were making \$4M decisions based on data that was already 48 hours old by the time we reviewed it," she said. "That's not a reporting problem — it's a trust problem."

The team had tried consolidating into Salesforce natively, but the custom reporting limitations meant finance and sales were always working from different numbers...

(Case study continues through Approach, Results, and What's Next sections)

Testimonial Pull Quotes: 1. *"We went from 12 hours of forecast prep to under 2 — in the first month."* 2. *"For the first time, sales and finance are looking at the same number on the same day."* 3. *"I'd recommend this to any RevOps leader who's tired of making big decisions on stale data."* 4. *"The ROI was obvious within 6 weeks. I didn't need to make a business case to my CFO — the numbers made it for me."* 5. *"It's not just a time save. It's a confidence save."*

Variations

Variation A — Anonymous Case Study ("A Leading Fintech Company")

Replace all named references with industry descriptors. Adjust the result framing to focus on percentages rather than absolute numbers to protect confidentiality while maintaining credibility.

Variation B — Video Testimonial Script

Replace the written case study with: "Write a 90-second interview script for a customer video testimonial. Include 5 questions for the customer to answer on camera, and a suggested format for the final edit: problem → solution → result → recommendation."

Prompt 9: The Content Brief Template

Title: *Creative Brief Builder — Brief Any Writer or AI to Produce On-Brand Content Every Time*

Prompt

You are a content director who manages a team of freelance writers and AI writing tools. Your job is to write content briefs so thorough and clear that any writer – human or AI – can produce on-brand, accurate, high-performing content without a single back-and-forth.

I need a content brief for the following piece:

Project details:

- Content type: {content_type – e.g. "1,500-word blog post", "email sequence", "landing page", "white paper"}
- Working title: {working_title}
- Final audience: {audience – who will read this and what is their context}
- The job this content must do: {job_to_be_done – e.g. "convert a trial user to a paying customer", "rank for [keyword]", "support a sales conversation at the proposal stage"}
- Keywords to target (if SEO): {keywords}
- Desired word count: {word_count}
- Tone and voice guidance: {tone – include 3 adjectives and one brand comparison e.g. "Direct and data-led like HBR, with Gong's confidence"}
- Things to include (non-negotiable): {must_include}
- Things to exclude (strict): {must_exclude}
- Competitors to be aware of: {competitors}
- Preferred sources or research to draw from: {sources}
- Internal links to include: {internal_links}
- CTA: {cta}
- Due date and word limit: {deadline_and_word_limit}

Write a complete content brief that includes:

1. Project overview (3 sentences)
2. Audience profile (5 bullets: who they are, what they know, what they want, what they fear, what will make them act)
3. Content objective (what success looks like – both qualitative and quantitative)

4. Structural outline (all H2s and H3s with 1-sentence description of each section's purpose)
5. Tone and voice guide with 3 "write like this / not like this" examples
6. SEO guidance (keyword placement map)
7. Research and accuracy requirements
8. Formatting rules
9. Review checklist (10-point quality check before submission)

Example Output

Project Overview: This 1,800-word blog post targets mid-market HR leaders searching for performance management software alternatives. It must rank for "continuous performance management tools" while serving as a mid-funnel asset that moves readers from awareness to consideration. The piece should feel like a trusted analyst's review, not a vendor's pitch.

Audience Profile: - **Who they are:** HR Directors and VPs at companies with 200–1,000 employees, typically using annual review cycles they know are broken - **What they already know:** They're aware that annual reviews are outdated — they've read the McKinsey articles; they don't need convincing on the "why" - **What they want:** A practical framework for building a system that their managers will actually use - **What they fear:** Implementing a new tool that creates more admin and gets abandoned in 6 months - **What will make them act:** Seeing that another company their size made this transition successfully without disrupting the business

Tone Guide — Write Like This / Not Like This: -  "Most performance management systems fail because managers don't use them."  "In today's rapidly evolving business landscape, performance management is more important than ever." -  "Here's what to do instead."  "There are several strategies organisations can consider when approaching this challenge." -  "It takes 3 weeks, not 3 months."  "Implementation timelines may vary depending on organisational complexity."

Variations

Variation A — AI Prompt Brief

Adjust the brief format to be written as a direct instruction prompt for AI tools (Claude, ChatGPT, Gemini). Replace "writer guidance" sections with direct imperative commands: "Do not use passive voice. Open every section with a claim, not a question. Include exactly one data point per H2 section."

Variation B — Video Production Brief

Swap content type to video and adjust all sections to cover: script requirements, visual style guide, B-roll direction, on-screen graphic specifications, voiceover tone, and thumbnail brief.

Prompt 10: The Content Audit & Strategy Reset

Title: *Content Strategist on Demand — Full Audit and 90-Day Plan for Underperforming Content*

Prompt

You are a senior content strategist who has audited content programs at over 50 B2B companies and identified why content that should be working is underperforming. Conduct a structured content audit and produce a 90-day action plan.

My content program details:

- Company and product: {company_and_product}
- Target audience: {target_audience}
- Current content channels (list all): {channels – e.g. "blog, LinkedIn, email newsletter, YouTube, podcast"}
- Monthly publishing volume per channel: {publishing_volume}
- Current organic traffic (monthly): {organic_traffic}
- Email list size and average open rate: {email_stats}

- Social follower counts and engagement rates: {social_stats}
- Top 3 best-performing pieces of content (by any metric): {top_content}
- Content I've invested in that underperformed: {underperforming_content}
- Business goal content should be supporting: {business_goal – e.g. "generate 50 qualified demos per month" or "reduce CAC by 20%"}
- Current content team and budget: {team_and_budget}
- What I believe the problem is: {my_hypothesis}

Conduct the following analysis and produce the output below:

****Part 1 – Audit Findings****

- 5 likely reasons why the content program is underperforming (based on the data provided)
- 3 quick wins achievable within 30 days without additional budget
- 2 structural problems that require strategic changes, not tactical fixes

****Part 2 – 90-Day Content Strategy Reset****

Month 1: Foundation (what to fix first and why)

Month 2: Momentum (what to build on the fixed foundation)

Month 3: Scale (what to systematise and expand)

For each month: 3 specific initiatives, success metrics, and resource requirements.

****Part 3 – Content Mix Recommendation****

Recommended % split across content types (educational, thought leadership, product, social proof, SEO) with reasoning based on business goal.

****Part 4 – Editorial Calendar Template****

A repeatable weekly publishing cadence that fits within the current team size and budget.

Example Output

Part 1 — Audit Findings:

5 likely root causes: 1. **SEO-first, audience-second:** Publishing volume is high but keyword difficulty is too competitive for the domain authority. Traffic ceiling hit early. 2. **No content funnel alignment:** All content sits at the top of the funnel (awareness). Nothing converts readers into leads. 3. **Distribution is an afterthought:** Posts are published without a promotion plan. Email list is underused for content amplification. 4. **No content differentiation:** Topics overlap heavily with competitor content — there is

no distinctive editorial POV. 5. **Success metrics are vanity metrics:** Tracking pageviews instead of content-sourced pipeline.

3 quick wins in 30 days: 1. Add a contextual CTA to the top 10 most-trafficked posts (expected: 20–30% uplift in lead capture from existing traffic) 2. Republish the top 3 posts to LinkedIn as native posts — not links (expected: 5–10x reach vs. link posts) 3. Launch a 4-email sequence to re-engage the email list using the existing best-performing content

Part 2 — Month 1 Plan:

Initiative 1: Conduct a keyword gap analysis and deprioritise any keyword with DR >40 above current domain authority. Rebuild the content roadmap around longtail queries with clear buyer intent.

Initiative 2: Create a "content-to-pipeline" attribution dashboard. Identify which pieces of content contacts touched before becoming customers.

Initiative 3: Establish a weekly editorial rhythm with a 2-week production lead time. Stop reactive publishing.

Success metrics: Keyword opportunity list of 50 winnable terms; attribution model live in CRM; zero reactive publishing by end of month.

Content Mix Recommendation: For a company whose goal is demo generation: - 40% SEO/educational (long-term lead gen engine) - 25% social proof / case studies (bottom-funnel deal support) - 20% thought leadership (brand differentiation, feeds social) - 10% product education (reduces churn, supports expansion) - 5% experimental (test new formats quarterly)

Variations

Variation A — New Content Program (Starting from Zero)

Replace the audit section with: "Build me a content strategy from scratch for a company with no existing content assets. Start with ICP research, move to topic pillars, then prioritise the first 10 pieces of content that will have the highest business impact."

Variation B — Content ROI Report for Leadership

Adjust the output to: "Produce an executive-ready content performance report I can present to the CEO or board. Include a one-page summary, key metrics vs. benchmarks, investment vs. return analysis, and a 3-bullet recommendation for where to focus next quarter."

End of Category 02: Content Creation & Repurposing

Part of the "100 AI Mega Prompts for Business" digital product. Categories include: Sales & Cold Outreach · Content Creation & Repurposing · Hiring & HR · Operations · Leadership & Strategy · Customer Success · Finance · Legal · Product · and more.

Category 03: Customer Support Automation

10 expert-level prompts that help you write support responses, build self-service resources, handle escalations, train support teams, and design automated

workflows — without sacrificing the human touch. Each prompt replaces 1–3 hours of reactive, repetitive work.

Prompt 1: The Support Ticket Response Writer

Title: *Instant Ticket Resolver — Professional, Empathetic Support Replies in Seconds*

Prompt

You are a senior customer support specialist with 10+ years of experience at SaaS companies known for exceptional customer service (think Intercom, Notion, or Zapier). Your replies are always clear, empathetic, accurate, and efficient – they resolve the issue on the first contact wherever possible.

Context:

- Company name: {company_name}
- Product or service: {product_or_service}
- Support channel: {channel – e.g. "email", "live chat", "help desk ticket"}
- Customer's name: {customer_name}
- Customer's account tier or plan: {plan_tier – e.g. "free", "Pro", "Enterprise"}
- The customer's message (paste in full): {customer_message}
- The actual answer or resolution to their issue: {resolution – describe what needs to happen or what the fix is}
- Any relevant links, docs, or resources: {resources}
- Tone guideline: {tone – e.g. "warm and professional", "casual and friendly", "formal"}
- Any constraints (e.g. can't offer refund, escalation needed): {constraints}

Write a complete support reply that:

1. Opens by acknowledging the customer's frustration or question with genuine empathy – no hollow phrases like "Great question!" or "I totally understand your frustration"
2. Confirms you understand the specific issue (paraphrase it back in one sentence)
3. Provides the resolution clearly – use numbered steps if it's a process; use plain prose if it's explanatory
4. Anticipates the one most likely follow-up question and pre-answers it
5. Closes with a warm, specific sign-off – not "Let me know if

there's anything else I can help with"

6. Adds a subject line (for email) and a suggested internal tag/category for ticket routing

Keep the reply human, not template-y. Never use passive voice for action items. Length: appropriate to the complexity – don't pad simple issues, don't oversimplify complex ones.

Example Output

Subject: Re: Unable to export data to CSV — here's the fix

Internal tag: export-bug / pro-tier / resolved

Hi Marcus,

Losing access to your data export right before a board report is genuinely stressful — I want to get this sorted for you quickly.

From what you've described, the CSV export failing silently is almost certainly caused by a filter combination that returns more than 50,000 rows — our current export limit. Here's how to work around it right now:

1. Go to **Reports** → **Export Settings** and enable "Split by date range"
2. Set the range to 30-day chunks instead of the full year
3. Re-run the export — each chunk will download separately and you can merge them in Excel or Google Sheets

This should take under 5 minutes and will get you everything you need.

One thing to watch: if you're exporting with custom field filters active, deactivate them first and re-apply after the split — a known quirk we're fixing in next month's release.

If the split export still fails, reply here and I'll run it manually from the back end and send you the file directly.

Tom Customer Support, Acme Analytics

Variations

Variation A — Live Chat Version (Short-Form)

Add to the prompt: "Rewrite this as a live chat reply. Maximum 4 short messages sent sequentially. Each message should be under 40 words. Use natural chat cadence — acknowledge first, then solve, then confirm. No bullet points."

Variation B — Angry or Escalated Customer

Add: "The customer is visibly frustrated and has threatened to cancel. Adjust the tone to prioritise de-escalation above all else. Do not be defensive. Acknowledge any service failure honestly. Offer a concrete goodwill gesture within these parameters: {goodwill_options}."

Prompt 2: The Help Centre Article Writer

Title: *Self-Service Article Builder — Help Docs That Actually Deflect Tickets*

Prompt

You are a technical writer who specialises in creating help centre documentation for SaaS products. Your articles reduce ticket volume by 30-40% because they anticipate the real questions behind the question and are written for users under stress, not for internal stakeholders. Write a complete, publish-ready help centre article.

Article details:

- Product name: {product_name}
- Article topic: {article_topic – e.g. "How to set up two-factor authentication", "Understanding your invoice", "Connecting your CRM integration"}
- The primary user question this article answers: {primary_question}
- Related questions this article should also address:

```
{related_questions}
- The user's context when they search for this article (what
they're trying to do, what might have gone wrong): {user_context}
- Step-by-step process to complete the task (describe in plain
language): {process_steps}
- Known edge cases or common errors: {edge_cases}
- Screenshots or visuals available: {visuals – e.g. "yes – I'll add
later" or "none"}
- Audience technical level: {tech_level – e.g. "non-technical end
users", "technical admins", "developers"}
- Product UI terminology (list key button names, menu paths, etc.):
{ui_terms}
- Link to related articles: {related_articles}
```

Write the article in the following structure:

1. Title (H1) – action-oriented, matches search intent exactly
2. One-sentence summary (what this article covers and who it's for)
3. Prerequisites (if any – keep short)
4. Step-by-step instructions (numbered, using exact UI labels in ****bold****)
5. What to expect after completing the steps (confirmation state)
6. Troubleshooting section (3–5 common issues with direct solutions)
7. FAQs (3–4 questions)
8. Related articles (link list)

Writing rules: Use "you" throughout. Active voice only. One instruction per step. Never say "simply" or "just" – these dismiss difficulty and frustrate users who are stuck.

Example Output

H1: How to Connect Your Salesforce CRM to Pipedata

This article explains how to set up the Salesforce integration for the first time. It's written for Salesforce admins with Pipedata Pro or above.

Before you start: - You need Salesforce System Administrator permissions - Your Pipedata plan must be Pro or above ([upgrade here]) - Have your Salesforce org URL ready (e.g. mycompany.salesforce.com)

Steps:

1. In Pipedata, click **Settings** in the left sidebar
2. Select **Integrations**, then click **Connect** next to Salesforce
3. Click **Authorise with Salesforce** — you'll be redirected to the Salesforce login screen
4. Sign in with your Salesforce admin credentials
5. Review the permissions Pipedata is requesting, then click **Allow**
6. You'll be redirected back to Pipedata — you should see a green **Connected** badge next to Salesforce

What to expect: Your first data sync begins automatically and takes 5–20 minutes depending on your Salesforce data volume. You'll receive an email when it's complete.

Troubleshooting:

"Authorisation failed" error after clicking Allow → This usually means your Salesforce org has IP restrictions enabled. Ask your Salesforce admin to whitelist Pipedata's IP range: `203.0.113.0/24`

Connected badge shows but no data is syncing → Check that your Salesforce profile includes API access. Navigate to **Salesforce** → **Setup** → **Profiles** → **[Your Profile]** → **API Enabled**.

Variations

Variation A — API / Developer Documentation

Change the audience to developers and restructure as: Overview → Authentication → Endpoint reference → Code examples (in 2–3 languages) → Error codes → Rate limits. Use code blocks for all technical content.

Variation B — Video Script for Tutorial

Convert the article into a screen-recording script: "Write this as a 3–5 minute tutorial video walkthrough. Include exact on-screen narration, cues for where to zoom or highlight, and chapter markers."

Prompt 3: The FAQ Generator

Title: *FAQ Architect — Comprehensive FAQ Pages That Pre-Empty Every Customer Question*

Prompt

You are a customer experience strategist who has audited hundreds of support queues and knows exactly which questions get asked most – and why. Build a complete, well-organised FAQ page for my product or service that genuinely reduces inbound support volume.

Context:

- Company and product: {company_and_product}
- Target customer (who uses this product): {target_customer}
- Product category and core use case: {product_category_and_use_case}
- Current top support ticket topics (list as many as you know): {top_ticket_topics}
- Key objections or hesitations prospects have before buying: {pre-purchase_questions}
- Common onboarding struggles new users face: {onboarding_struggles}
- Billing or pricing questions that come up repeatedly: {billing_questions}
- Technical or integration questions: {technical_questions}
- Any policies that need to be clearly communicated (refunds, cancellation, data, SLA): {policies}
- Brand voice for FAQs: {tone – e.g. "plain, direct, no jargon"}

Write a structured FAQ page with the following sections:

1. ****Getting Started**** (5–7 questions)
2. ****Pricing & Billing**** (4–6 questions)
3. ****Features & Capabilities**** (6–8 questions)

4. ****Integrations & Technical**** (4–6 questions)
5. ****Account & Security**** (4–5 questions)
6. ****Cancellation & Refunds**** (3–4 questions)

For each question:

- Write the question exactly as a customer would ask it (conversational, first-person)
- Write a clear, complete answer (50–120 words – enough to actually answer it, not so much it overwhelms)
- Flag any questions where the answer should link to a deeper help article

After the FAQ, write a 3-sentence "Still need help?" section with CTA options (live chat, email, community forum).

Example Output

Getting Started

How long does it take to get set up? Most teams are up and running within a single afternoon. The initial setup wizard takes about 15 minutes — you'll connect your data source, configure your first dashboard, and invite your team. If you're connecting a CRM or data warehouse, allow an additional 30–60 minutes for the first sync. → *See: [Getting Started guide]*

Do I need technical skills to use this? No technical skills are required for day-to-day use. The dashboard, reports, and alerts are all point-and-click. If you're setting up a custom API integration or connecting a data warehouse, you'll want someone with basic SQL familiarity — but that's optional, not required.

Pricing & Billing

Can I change my plan after I sign up? Yes — you can upgrade or downgrade at any time from **Settings** → **Billing**. Upgrades take effect immediately and are prorated to your billing cycle. Downgrades take effect at the start of your next billing period so you keep access to current features until then.

What happens to my data if I cancel? Your data remains accessible for 30 days after cancellation so you can export anything you need. After 30 days, all data is permanently deleted in line with our data retention policy. → *See: [Data Retention Policy]*

(FAQ continues through all 6 sections)

Still need help? Can't find what you're looking for? Our support team typically responds within 2 hours on business days. Start a live chat below, email us at support@{company}.com, or search our full help centre for more detailed guides.

Variations

Variation A — Pre-Sales FAQ (For Sales & Marketing Pages)

Focus exclusively on pre-purchase questions. Reframe all answers to convert hesitation into confidence. Add a final section: "Why {company} vs. alternatives" with 4–5 honest comparison questions.

Variation B — Internal Agent FAQ (Support Team Reference)

Rewrite as an internal knowledge base document for support agents. Replace customer-facing language with agent instructions: "When a customer asks X, explain Y and check Z in the back end first." Add escalation criteria for each topic.

Prompt 4: The Escalation & Complaint Handler

Title: De-escalation Script Builder — Turn Angry Customers Into Loyal Advocates

Prompt

You are a senior customer experience manager who has handled thousands of escalated complaints, including public social media

crises, churn-risk accounts, and enterprise-level service failures. You know that how a company handles a crisis is more memorable than the crisis itself. Help me write a response to a serious customer complaint or escalation.

Situation details:

- Company and product: {company_and_product}
- Customer name and tier: {customer_name}, {account_tier}
- Summary of the complaint or issue: {complaint_summary}
- How long the issue has been ongoing: {issue_duration}
- What the customer has already tried or been told: {prior_interactions}
- Whether there was a genuine service failure on our side: {service_failure – "yes", "no", or "partial"}
- What we can actually offer as resolution: {resolution_options – e.g. "full refund", "service credit", "dedicated account manager", "expedited fix timeline"}
- What we cannot offer: {constraints}
- Channel this response is for: {channel – "email", "phone call script", "public social media reply", "in-person meeting"}
- Escalation level: {level – "frontline agent", "team lead", "VP/Director"}

Write the response including:

1. An opening that acknowledges the specific failure – no deflection, no corporate language
2. A clear acceptance of responsibility where warranted (or a transparent explanation where the failure was partial or external)
3. The concrete resolution you are offering – stated clearly with timeline
4. What will be done differently to prevent recurrence
5. A personal close that restores the relationship, not just the transaction

Also write:

- An internal escalation summary (5 bullet points for the handover note to the next team)
- A suggested follow-up touchpoint (what to do in 48–72 hours to confirm resolution)

Tone: Calm, direct, accountable. Never defensive. Never over-apologetic to the point of sounding insincere. This should read like a message from a leader, not a script.

Example Output

Email — VP-Level Escalation:

Subject: A personal note from our team — and what we're doing to fix this

Hi Stephanie,

I've reviewed your account history and I want to be direct with you: what happened over the past three weeks is not acceptable, and I'm sorry it took this escalation for you to get the attention your account deserved.

To be clear about what went wrong: two support tickets were misrouted and sat unassigned for a combined 11 days. There is no technical reason for that — it was a process failure on our side, and it cost you two weeks of progress on your Q3 reporting migration.

Here is what we are doing right now:

1. Your account is being assigned a dedicated implementation specialist — Priya — who will reach out to you before end of day today
2. We are crediting your account with two months of service (\$1,400) — no action needed on your side
3. Priya will personally own your migration through completion, with weekly check-ins until you are live

We have already reviewed the routing logic that caused this gap and it has been corrected across all enterprise accounts.

I would like to schedule a 15-minute call with you next week — not to sell you anything, but to make sure we've actually restored your confidence in us.

David Marsh VP Customer Experience, Pipedata

Internal Escalation Handover: - Account: Stephanie Okafor, Pipedata Enterprise (\$8,400 ARR), renewal in 4 months - Root cause: Ticket misrouting — 2 tickets unassigned 5+ days each; routing rules fixed 2024-03-14 - Resolution offered: 2-month credit + dedicated implementation specialist (Priya Chen) - Churn risk: High — flag for CSM retention review - Follow-up required: Priya to contact by EOD; VP call scheduled for w/c March 18

Variations

Variation A — Public Social Media Complaint Response

Add: "Rewrite this as a public-facing reply on Twitter/X or a Google Review response. Max 280 characters for social, 300 words for a review reply. Acknowledge the issue, take it offline professionally, and never argue publicly. Tone: human and accountable, not PR-scripted."

Variation B — Proactive Outreach for a Service Incident

Flip the scenario: "We caused a service disruption before the customer complained. Write a proactive outreach email from the CEO or VP level, going out to all affected accounts within 2 hours of the incident. Include: what happened, impact, resolution status, and ETA."

Prompt 5: The Chatbot Conversation Flow Designer

Title: *Chatbot Scriptwriter — Conversation Flows That Resolve, Not Frustrate*

Prompt

You are a conversational UX designer and chatbot strategist who has built support automation for companies like Drift, Intercom, and Zendesk. You know that most chatbots fail because they're designed around the company's menu structure, not the user's intent. Design a complete chatbot conversation flow for my support use case.

Context:

- Company and product: {company_and_product}
- Chatbot purpose: {chatbot_purpose — e.g. "deflect tier-1 support tickets", "qualify inbound leads", "onboard new users", "handle billing questions"}
- Top 5 reasons customers contact support: {top_contact_reasons}
- Resolution that can be fully automated (no agent needed):

```
{automatable_resolutions}
- Scenarios that always require a human agent:
{human_required_scenarios}
- Business hours and off-hours handling: {hours_and_coverage}
- Tone for the bot: {bot_tone – e.g. "friendly and efficient",
"professional and precise"}
- Bot name (optional): {bot_name}
- CRM or support platform in use: {platform – e.g. "Intercom",
"Zendesk", "HubSpot"}
```

Design the following:

```
**1. Welcome Flow** (first message + intent detection branches)
**2. Flows for the top 3 support topics** (full conversation tree
with decision nodes, user inputs, bot responses, and success/
failure states)
**3. Human Handoff Flow** (how and when the bot escalates to a live
agent – including off-hours handling)
**4. Fallback Flow** (what happens when the bot doesn't understand
the user's intent – 3 attempts before handoff)
**5. Post-Resolution Survey** (3-question CSAT flow triggered after
any resolution)
```

For each flow:

- Write the exact bot copy (every message)
- Note the logic condition (e.g. "IF user selects X → go to node Y")
- Flag where CRM data should be pulled in dynamically
- Note where the flow can be personalised with user account data

Also write: 5 "anti-patterns" – chatbot mistakes to avoid for this specific use case.

Example Output

Welcome Flow:

Bot (immediate): "Hi {first_name} 🙌 I'm Aria, Pipedata's support assistant. I can help with most things instantly — or connect you with a human if needed. What brings you here today?"

*Quick reply buttons: [I need help with a feature] [Something isn't working]
[Question about my bill] [I want to talk to someone]*

Logic: If user types free text → run intent classifier. If intent confidence <70% → trigger Fallback Flow. If user selects button → go to corresponding sub-flow.

Flow 2 — "Something isn't working" (Bug/Error Report):

Bot: "I'm sorry to hear that — let's get this sorted. What part of Pipedata is affected?" Buttons: [Data not syncing] [Dashboard loading error] [Export failing] [Integration disconnected] [Something else]

If "Data not syncing": Bot: "Got it. When did you first notice the issue?" Buttons: [Just now] [Today] [Yesterday] [Longer than 2 days]

If "Longer than 2 days": Bot: "That's frustrating — I want to flag this to our team right away. While I pull up your account, can you confirm the data source affected?" (→ pull {integration_name} from CRM)

Bot: "I can see your Salesforce connection last synced on {last_sync_date}. I'm creating a priority ticket for our team now — they'll respond within 2 hours. Reference number: #{ticket_id}. Want me to email you a copy?"

Anti-patterns to avoid: 1. Asking for information you already have in the CRM (e.g. "What's your account email?" when they're logged in) 2. Offering a help article as the only resolution — always offer a human alternative in the same message 3. Looping users back to the main menu after a failed resolution attempt 4. Using "I don't understand that" as a fallback — it sounds broken; use "Let me find the right person for this" instead 5. Making users repeat information when escalating to a human — always pass the conversation context

Variations

Variation A — Lead Qualification Bot (Sales)

Repurpose the flow for inbound lead qualification: "Design a bot that identifies, qualifies, and routes inbound website visitors. Include: intent detection (buyer vs. support), BANT qualification questions, calendar booking integration, and routing rules for different lead tiers."

Variation B — Onboarding Bot (New User Activation)

Redesign the flow for post-signup onboarding: "Build a day-1 onboarding bot that appears in-app after signup. Guide new users through their first 3 key actions, check progress at 24 and 72 hours, and trigger a human CSM outreach if activation milestones aren't hit."

Prompt 6: The Support Email Template Library

Title: *Template Arsenal — 20 Reusable Support Email Templates for Every Situation*

Prompt

You are a customer support operations manager who has built template libraries used by support teams of 50+ agents. You know that good templates are invisible – customers never feel like they're reading one. Build a complete support email template library for my team.

Context:

- Company name and product: {company_and_product}
- Support team size: {team_size}
- Primary support channel: {channel}
- Average ticket volume per day: {ticket_volume}
- Customer base description: {customer_base – e.g. "SMB SaaS users", "enterprise IT admins", "e-commerce shoppers"}
- Brand voice for support: {brand_voice}
- Common ticket categories (list 8–10): {ticket_categories}
- Escalation structure: {escalation_structure}
- Any specific language to use or avoid: {language_guidelines}

Write 20 email templates across these categories:

****Acknowledgement & Triage (3 templates)****

- Initial response (within SLA)
- Complex issue – needs investigation
- Ticket received outside business hours

****Resolution (5 templates)****

- Issue resolved – straightforward fix
- Issue resolved – workaround provided
- Issue resolved – bug confirmed and queued for fix
- Issue resolved – user error (tactful)
- Issue resolved – third-party dependency

****Escalation & Follow-up (4 templates)****

- Escalating to tier-2 or engineering
- Following up on an open ticket (day 3)
- Chasing missing information from the customer
- Closing a ticket due to no response (3 attempts)

****Billing & Account (4 templates)****

- Refund approved
- Refund denied (policy-compliant)
- Subscription cancellation confirmation
- Renewal reminder with added value

****Proactive & Relationship (4 templates)****

- Proactive incident notification
- Post-resolution check-in (48 hours)
- Quarterly check-in for high-value accounts
- Feedback request after resolution

For each template: include the subject line, full body text with {variables}, and one line of usage guidance. Mark any variables that should be auto-populated from the CRM.

Example Output

Template 01 — Initial Response (Within SLA)

Usage: Send within 15 minutes of ticket creation during business hours.

Subject: We've got your message — here's what happens next [{ticket_id}]

Hi {first_name},

Thanks for reaching out. I've received your message about {issue_summary_one_line} and I'm looking into it now.

{IF_SIMPLE: I'll have an answer for you within the next hour.} {IF_COMPLEX: This will take a little investigation — I'll update you by {response_sla_time} with either a resolution or a status update.}

Your reference number is #{ticket_id} — use this if you need to follow up.

{agent_first_name} {company_name} Support

Template 08 — Issue Resolved: User Error (Tactful)

Usage: When the root cause is user action, but framed as a learning moment, never as blame.

Subject: Re: {original_subject} — sorted, plus a quick tip

Hi {first_name},

Good news — I've tracked down what was happening and it's an easy fix going forward.

The {feature_name} works slightly differently from what you described: {one_sentence_explanation}. It's a common point of confusion and something we're improving in our documentation.

Here's what to do next time: {one_step_fix}.

I've gone ahead and {any_corrective_action_taken} on your account so you're in good shape now.

If you run into anything else, don't hesitate to reach out.

{agent_first_name}

(All 20 templates follow in the same format)

Variations

Variation A — Live Chat Template Library

Adapt the templates for live chat: "Rewrite all 20 templates as chat snippets — each under 50 words, designed to be sent as a single chat message. Keep the human tone; remove formal sign-offs."

Variation B — Multilingual Template Scaffold

Add: "For each template, identify the 5 key phrases most likely to be mistranslated or culturally awkward, and suggest plain-language alternatives that localise well."

Prompt 7: The Customer Onboarding Email Sequence

Title: *Onboarding Sequence Architect — Activation Emails That Turn Sign-Ups Into Power Users*

Prompt

You are a customer success and lifecycle marketing specialist who has designed onboarding sequences that improve 30-day activation rates by 40-60%. You understand that most users who churn in the first 30 days do so because they never reached their first "aha moment" — and your job is to get them there through email.

Context:

- Company and product: {company_and_product}
- Target user (who just signed up): {user_profile}
- The "aha moment" — the moment a user first gets genuine value from the product: {aha_moment — e.g. "first successful data sync", "first campaign sent", "first report shared with their team"}
- Key activation steps the user needs to complete: {activation_steps — list 4-6}
- Most common points where new users drop off: {drop_off_points}
- Product features most users don't discover on their own:

```
{hidden_value_features}
- Tone for onboarding emails: {tone}
- Trial length (if applicable): {trial_length}
- Support resources available: {support_resources – e.g. "live
chat", "help centre", "weekly onboarding webinar"}
```

Design a 10-email onboarding sequence covering the first 21 days:

For each email:

- Send trigger (time-based OR behaviour-based)
- Subject line
- Preview text
- Full email body (150–250 words)
- Primary CTA
- If-not-opened logic (what happens if the user doesn't open within 24 hours)

Sequence map:

- Day 0: Welcome (sent immediately after signup)
- Day 1: First action prompt
- Day 2: Feature spotlight #1
- Day 3 (behaviour-based): If no activation → re-engagement; If activated → next step
- Day 5: Social proof / success story
- Day 7: Feature spotlight #2 (the one they're missing)
- Day 10: Check-in + human touchpoint
- Day 14: Midpoint progress / trial reminder (if applicable)
- Day 18: Feature spotlight #3 + power user tip
- Day 21: Conversion ask or success celebration

Also write: a branch for users who complete all activation steps early (a "fast track" sequence that moves them to advanced features sooner).

Example Output

Email 1 — Day 0: Welcome (sent immediately)

Trigger: User completes signup *Subject:* You're in — here's your first move *Preview text:* Takes 4 minutes. Makes everything else easier.

Hi {first_name},

Welcome to Pipedata — I'm glad you're here.

You can spend time exploring, or you can get to the part where it actually becomes useful. I'd recommend the latter.

Your one task for today: Connect your first data source. It takes about 4 minutes and everything else you do in Pipedata builds on it.

→ **[Connect your data source now]**

Once you've done that, you'll be able to see your pipeline in real time instead of rebuilding it manually every week. That's usually the moment people get what this is for.

If anything gets confusing, our help centre has a step-by-step walkthrough, or you can start a live chat and a real person will help you — no bots, no ticket queue.

Talk soon, Jamie Customer Success, Pipedata

P.S. If you run into any trouble on the connection, reply directly to this email. I'll get back to you personally.

Email 4 — Day 3 (Behaviour branch — No activation)

Trigger: Day 3 AND no data source connected *Subject:* Still finding your way around?

Preview text: Might be helpful.

Hi {first_name},

I noticed you haven't connected a data source yet — that's usually the first step where people hit a snag.

A couple of things that often help:

- If you're not sure which source to connect first, [this 2-minute guide] explains the most common setups
- If you ran into a specific error, our team can fix it for you — just reply here with a screenshot and we'll sort it out in under an hour

Not sure Pipedata is the right fit? That's okay too — reply and tell me what you're trying to solve and I'll give you an honest answer.

Variations

Variation A — B2C / Consumer App Onboarding

Adjust the sequence for a consumer audience: "Shorten emails to 80–120 words. Use push notification copy alongside emails. Add SMS touchpoints at Day 0 and Day 7. Replace B2B language with consumer-friendly copy."

Variation B — Enterprise Account Onboarding (High-Touch)

Expand to include: "A parallel sequence for the IT admin/technical contact alongside the end-user sequence. Add a 'kickoff call' scheduling email at Day 0 and an executive stakeholder update email at Day 14."

Prompt 8: The CSAT & NPS Follow-Up Engine

Title: *Feedback Loop Builder — Turn Survey Scores into Actionable Conversations*

Prompt

You are a customer experience analyst and CX strategist who knows that CSAT and NPS scores are only as valuable as the follow-up actions they trigger. Help me build a complete feedback response system that closes the loop with every customer who responds to a survey.

Context:

- Company and product: {company_and_product}
- Survey type in use: {survey_type – "CSAT (1-5)", "NPS (0-10)", "CES (1-7)", or "custom"}

- Customer segments: {customer_segments – e.g. "trial users", "paying customers", "enterprise accounts"}
- Person responding (role): {responder_role – e.g. "account manager", "CS team", "automated"}
- Response SLA target: {response_sla – e.g. "within 24 hours"}
- Escalation path for detractors: {escalation_path}
- Business goal for the feedback program: {goal – e.g. "reduce churn", "identify upsell opportunities", "improve the product"}

Write a complete follow-up response system:

****For CSAT / NPS Detractors (score 1-2 / 0-6):****

- Immediate acknowledgement email (same day)
- 48-hour follow-up if no reply
- Escalation trigger criteria and handoff note
- Recovery offer options language

****For CSAT / NPS Passives (score 3 / 7-8):****

- Curiosity email to understand the gap
- Feature education based on likely friction points
- Invitation to a feedback call

****For CSAT / NPS Promoters (score 4-5 / 9-10):****

- Thank you and recognition email
- Referral or review ask (timed, not pushy)
- Case study or testimonial invitation

Also write:

- An internal alert template for when a high-value account submits a detractor score
- A weekly digest email template for sending CSAT/NPS trends to the leadership team
- 5 open-ended follow-up questions to deepen understanding across all score ranges

Example Output

Detractor Response — Immediate Acknowledgement:

Subject: Your feedback — I want to make this right

Hi {first_name},

Thank you for taking the time to share your honest feedback. A score of {score} tells me we haven't given you the experience you should be having — and I want to understand why.

Could you spare 5 minutes for a quick call this week? I'd like to hear directly what's falling short and what we can do differently.

If a call isn't convenient, just reply here — I read every message personally.

{cs_manager_name} Customer Success, {company_name}

Promoter Response — Review Ask:

Subject: You made our day — could you make someone else's?

Hi {first_name},

Thank you for the kind score — it genuinely means a lot to the team.

If you've got 2 minutes, we'd love it if you shared your experience on G2 or Capterra. Reviews from people who use the product every day help others make better decisions — and they mean more than anything we could say about ourselves.

→ [Leave a review on G2] (takes about 2 minutes)

Either way, thank you for being a Pipedata customer. It's the whole reason we show up.

{cs_manager_name}

Internal Alert — High-Value Detractor:

 **NPS ALERT — Enterprise Account - Account:** {company_name} ({arr} ARR) -

Respondent: {contact_name}, {title} - **Score:** {score}/10 - **Verbatim comment:**

"{verbatim}" - **Action required:** CSM outreach within 4 hours; flag for QBR agenda; escalate to VP CS if no response by EOD

Variations

Variation A — Post-Support Ticket CSAT

Narrow the scope to post-ticket CSAT: "Write follow-up flows specifically triggered after a support ticket is closed. The context is always 'did we solve your problem?' — responses should be specific to the ticket topic, not general."

Variation B — Annual NPS Campaign

Expand to a full annual NPS survey campaign: "Write the survey invitation email, reminder email, thank-you email, and all three score-segment follow-ups. Include a quarterly board summary template showing NPS trend, top drivers, and recommended actions."

Prompt 9: The Support Team Training Guide

Title: *Support Playbook Builder — Train New Agents to Sound Like Your Best Agent*

Prompt

You are a support operations manager and trainer who has onboarded hundreds of customer support agents. You know that most support quality problems aren't attitude problems — they're knowledge and language problems. Build a training guide that turns a new hire into a confident, consistent support agent in their first 30 days.

Context:

- Company and product: {company_and_product}
- Support channel(s) agents will handle: {channels}
- New hire's background (experience level): {hire_background — e.g. "first support role", "experienced agent from a different industry"}
- Top 5 things agents get wrong in the first month: {common_mistakes}

- Your brand's support voice (3 adjectives + one comparison):
{voice_description}
- 3 example tickets the agent will face in week 1: {sample_tickets}
- Escalation process they need to know: {escalation_process}
- Tools they'll use: {tools – e.g. "Zendesk, Notion, Slack, Loom"}
- KPIs they'll be measured on: {kpis – e.g. "CSAT >90%, FRT <1hr, resolution rate >80%"}

Build the following training guide:

****Module 1 – Brand Voice & Tone (with examples)****

The 5 rules of writing in our voice, with "before and after" rewrites of 5 real-sounding customer emails.

****Module 2 – Product Knowledge Scaffold****

The 10 things every agent must understand before handling their first ticket, structured as a learning checklist.

****Module 3 – The Ticket Handling Framework****

A step-by-step process for handling any ticket from receipt to resolution – including when to escalate and how.

****Module 4 – Difficult Situations Playbook****

Scripts and guidance for: angry customers, feature requests masquerading as bugs, billing disputes, and requests agents cannot fulfil.

****Module 5 – Quality Checklist****

A 10-point self-review checklist every agent runs before hitting send.

Example Output

Module 1 — Brand Voice: 5 Rules

Rule 1: Be specific, not sympathetic. Customers don't need you to feel their pain — they need you to solve their problem. Replace emotional filler with concrete action.

-  "I completely understand how frustrating that must be, and I'm so sorry you're experiencing this issue."
-  "That error means your API key has expired — here's how to regenerate it in 30 seconds."

Rule 2: Never use passive voice for action items. Passive voice distances you from accountability and confuses customers about who does what.

-  "A refund will be processed within 5–7 business days."

-  "I'm processing your refund now — it'll appear in your account within 5 business days."

Rule 3: Don't use "unfortunately" as a softener for bad news. "Unfortunately" signals that you're about to disappoint someone without fixing anything. State the limitation clearly, then pivot to what you *can* do.

-  "Unfortunately, we don't offer phone support at your plan level."
-  "Phone support is available on our Enterprise plan. For your current plan, our live chat gets a first response in under 3 minutes — I'm here right now if that helps."

Module 5 — Pre-Send Quality Checklist:

Before hitting send on any reply, check: - [] Did I use the customer's name at least once? - [] Does the opening line acknowledge the specific issue (not a generic "thank you for reaching out")? - [] Is every action item written in active voice with a clear owner? - [] Did I anticipate the most likely follow-up question and address it? - [] Are any links I included tested and working? - [] Is the reply free of internal jargon or tool names the customer wouldn't recognise? - [] If the issue isn't resolved, does the customer know what happens next and by when? - [] Is the sign-off human — not "Please let me know if you have any further questions"? - [] Is the subject line (if email) relevant and specific? - [] Would I be comfortable if this reply was published publicly?

Variations

Variation A — Agent Scorecard & QA Rubric

Replace the training guide with: "Build a quality assurance scorecard for reviewing support tickets. Include a 20-point rubric with scoring criteria, weight per category, and calibration guidance for QA reviewers."

Variation B — New Product Feature Training Brief

Adjust for ongoing training: "Write a 1-page 'feature briefing' template that gets agents up to speed on a new product release in 15 minutes — covering: what changed, what customers will ask, what agents should say, and what to escalate."

Prompt 10: The Support Metrics & Reporting Dashboard Brief

Title: *Support Intelligence Report Builder — Weekly Insights That Drive Real Decisions*

Prompt

You are a customer support analytics lead who turns raw support data into executive-ready insights that drive product, staffing, and process decisions. Help me design and write a recurring support metrics report.

Context:

- Company and product: {company_and_product}
- Report audience: {audience — e.g. "VP Customer Success", "CEO and leadership team", "Support team manager"}
- Report frequency: {frequency — "weekly", "monthly", "quarterly"}
- Data I have access to: {data_sources — e.g. "Zendesk ticket data", "CSAT scores", "NPS results", "first response time logs", "resolution time data", "ticket category tags"}
- Current team size and structure: {team_structure}
- Current KPIs the team is measured on: {kpis}
- Biggest operational challenge right now: {current_challenge}
- What decisions this report should enable: {decisions — e.g. "staffing adjustments", "product bug prioritisation", "process improvements"}

Design and write the following:

****Part 1 — Report Template (fill-in-the-blank format)****

A complete weekly/monthly report template with all sections, metric placeholders, and commentary prompts.

****Part 2 — Metric Definitions & Benchmarks****

For each KPI, write: what it measures, how to calculate it,

industry benchmark, and what a warning sign looks like.

****Part 3 – Narrative Commentary Prompts****

10 sentence starters that help a support manager write insightful commentary (not just data dumps) for each section.

****Part 4 – 3 Sample Insights****

Three examples of the kind of insight this report should surface – written as if they came from a real week of data.

****Part 5 – Executive Summary Template****

A 5-bullet executive summary format that fits in a Slack message or email preview – the version for leaders who won't read the full report.

Example Output

Part 1 — Report Template (excerpt):

Support Performance Report — Week of {week_start_date}

Prepared by: {author_name} **Distribution:** {recipient_list}

At a Glance

Metric	This Week	Last Week	Target	Status
Total tickets received	{n}	{n}	—	—
First response time (median) {hrs}	{hrs}	{hrs}	<1hr	 /  / 
Resolution time (median) {hrs}	{hrs}	{hrs}	<8hrs	—
CSAT score	{%}	{%}	>90%	—
Ticket backlog	{n}	{n}	<20	—
Escalation rate	{%}	{%}	<10%	—

Volume & Category Breakdown

(Paste chart or table here)

Top 3 ticket categories this week: 1. {category_1} — {n} tickets ({%} of total) — trending {up/down} vs. last week 2. {category_2} — ... 3. {category_3} — ...

Emerging topic to watch: {emerging_topic — 1 sentence}

Part 3 — Narrative Commentary Prompts:

1. "The spike in [category] tickets this week was driven by..."
 2. "CSAT dropped by [X] points — the verbatim feedback suggests the root cause is..."
 3. "First response time improved despite higher volume because..."
 4. "The top 3 tickets this week point to a product gap in [area] — specifically..."
 5. "If current ticket velocity continues, the team will need [X] additional resource by [date] to maintain SLA."
-

Part 4 — Sample Insight #1:

"Integration-related tickets increased 34% week-over-week, concentrated on Salesforce sync errors. Cross-referencing with the engineering log, this correlates with the API rate limit change deployed on Tuesday. Recommend flagging to the product team for a hotfix and proactively emailing affected users before they contact support."

Executive Summary (Slack/email format):

 **Support Week in Review — {date}** - Ticket volume: {n} (+{%} vs. last week) — driven by {top_driver} - CSAT: {score}% ({direction} — {one-line reason}) - Backlog: {n} tickets ({status vs. target}) - Biggest issue: {1-sentence description + owner} - Action needed: {decision or ask for leadership}

Variations

Variation A — Real-Time Escalation Alert

Replace the weekly report with: "Write an escalation alert template that fires in real time when a key threshold is breached — e.g. CSAT drops below 80%, backlog exceeds 50 tickets, or an enterprise account submits 3+ tickets in 24 hours. Format for Slack, email, and PagerDuty."

Variation B — Quarterly Business Review (QBR) Deck Brief

Expand to: "Build a complete QBR slide deck outline for presenting support performance to the executive team. Include: trend analysis, root cause summary, team capacity review, top customer feedback themes, proposed investments, and 90-day roadmap."

End of Category 03: Customer Support Automation

Part of the "100 AI Mega Prompts for Business" digital product. Categories include: Sales & Cold Outreach · Content Creation & Repurposing · Customer Support Automation · Hiring & HR · Operations · Leadership & Strategy · Customer Success · Finance · Legal · Product · and more.

Category 04: Spanish Greetings & Communication

10 expert-level prompts that help you craft professional Spanish greetings, introductions, and communications for business contexts. Each prompt is designed to bridge language and cultural gaps, helping you connect authentically with Spanish-speaking clients, partners, and colleagues.

Prompt 1: The Professional Spanish Introduction

Title: *First Impressions in Spanish — Business Introduction That Builds Instant Trust*

Prompt

You are an expert Spanish business communication coach fluent in both Latin American and Castilian Spanish. Your job is to help me craft a professional introduction in Spanish.

Here is the context:

- My name: {your_full_name}
- My role/title: {your_job_title}
- My company: {your_company_name}
- What we do (one sentence): {your_value_proposition}
- Target audience (e.g. Mexican clients, Spanish partners): {target_audience}
- Tone desired (formal/semi-formal/friendly): {tone}
- Purpose of introduction (e.g. first meeting, email, phone call): {purpose}

Write a professional introduction in Spanish that:

1. Opens with the appropriate greeting for the context (e.g. "Buenos días", "Estimado/a", "Hola")
2. Introduces me and my company clearly and confidently
3. States the purpose of the communication
4. Uses culturally appropriate language for the target audience
5. Closes with a warm, professional sign-off

Also provide:

- An English translation for my reference

- Two alternative opening lines (more formal and more casual)
- Key cultural notes I should be aware of

Why it works: Combines linguistic accuracy with cultural intelligence, ensuring your Spanish greeting lands the way you intend — not just translated, but truly localised.

Prompt 2: The Cold Outreach Email in Spanish

Title: *Spanish Cold Email Writer — Personalised Outreach for Latin American & Spanish Markets*

Prompt

You are a bilingual B2B sales copywriter specialising in Spanish-language cold email outreach. Your job is to write a compelling cold email in Spanish for me.

Here is the context:

- My name: {your_full_name}
- My company: {your_company_name}
- What we do (one sentence): {your_value_proposition}
- Prospect name: {prospect_name}
- Prospect's company: {prospect_company}
- Prospect's country/region: {prospect_country_region}
- Pain point we solve: {pain_point}
- Specific result we deliver: {specific_result}
- Desired CTA: {cta}

Write a cold email in Spanish that:

1. Opens with a culturally appropriate greeting ("Hola {name}," / "Estimado/a {name}:")
2. Has a personalised first line relevant to their business
3. Briefly explains who I am and the problem I solve
4. Includes a specific, credible result
5. Ends with a clear, low-friction CTA
6. Uses the right regional Spanish variant for the prospect's location

Provide the email + an English version side by side.

Why it works: Region-aware Spanish outreach dramatically increases response rates by showing genuine cultural respect and localisation effort.

Prompt 3: The Meeting Opener in Spanish

Title: *Reunión Lista — Spanish Meeting Opener That Sets the Right Tone*

Prompt

You are a bilingual business facilitator who specialises in opening meetings with Spanish-speaking stakeholders. Help me craft the perfect meeting opener in Spanish.

Context:

- Meeting type: {meeting_type – e.g. discovery call, partnership discussion, client review}
- Attendees: {attendee_names_and_roles}
- My relationship with them: {relationship – e.g. first meeting, ongoing client, new prospect}
- Meeting objective: {main_goal}
- Tone: {formal/semi-formal/informal}
- Duration of opener (seconds): {e.g. 60 seconds}

Write a meeting opener in Spanish that:

1. Greets all attendees warmly and appropriately
2. Thanks them for their time
3. Briefly sets the agenda
4. Establishes a collaborative, positive atmosphere
5. Transitions smoothly into the meeting content

Include: Spanish script + English translation + pronunciation tips for key phrases.

Why it works: A well-crafted Spanish meeting opener signals respect and preparation, immediately building rapport with Spanish-speaking stakeholders.

Prompt 4: The Follow-Up Message in Spanish

Title: *Seguimiento Perfecto — Spanish Follow-Up That Keeps the Conversation Moving*

Prompt

You are a bilingual business communication specialist. Write a professional follow-up message in Spanish for me.

Context:

- Previous interaction: {what happened – e.g. discovery call, proposal sent, trade show meeting}
- Date of previous interaction: {date}
- Key points discussed: {summary_of_discussion}
- Next step I want: {desired_outcome – e.g. schedule next call, get a decision, share a proposal}
- Recipient's name and title: {name_and_title}
- Tone: {formal/semi-formal}

Write a follow-up message (email or WhatsApp – specify which: {channel}) in Spanish that:

1. Opens with a warm, contextual greeting referencing our last interaction
2. Summarises the key value points briefly
3. Proposes a clear next step
4. Is concise (under 150 words)
5. Closes with an appropriate sign-off for the channel

Provide: Spanish version + English translation.

Why it works: Timely, well-written Spanish follow-ups show professionalism and persistence — two highly valued traits in Spanish-speaking business cultures.

Prompt 5: The Thank You Note in Spanish

Title: *Gracias Con Estilo — Professional Spanish Thank You That Leaves a Lasting Impression*

Prompt

You are a bilingual etiquette and business communication expert. Help me write a genuine, professional thank-you note in Spanish.

Context:

- Reason for thanks: {reason – e.g. referral, completed project, great meeting, gift received}
- Recipient's name and relationship: {name_and_relationship}
- Specific detail to mention: {personalisation_detail}
- Desired tone: {warm/formal/heartfelt}
- Medium: {email/handwritten card/WhatsApp}

Write a thank-you note in Spanish that:

1. Opens with a sincere, culturally appropriate greeting
2. Clearly states what you are grateful for
3. Includes a specific personal detail that shows genuine appreciation
4. Reinforces the relationship
5. Closes with a warm, appropriate sign-off

Provide: Spanish version + English translation + one alternative closing line.

Why it works: In many Spanish-speaking cultures, relationship-building ("confianza") is central to business. A heartfelt thank-you note strengthens bonds and differentiates you from competitors.

Prompt 6: The Spanish LinkedIn Connection Request

Title: *Conexión Auténtica — Spanish LinkedIn Message That Gets Accepted*

Prompt

You are a bilingual LinkedIn outreach specialist. Write a personalised Spanish LinkedIn connection request for me.

Context:

- My name and role: {your_name_and_role}
- Target person's name, title, company: {target_info}
- Why I want to connect (honest reason): {reason}
- Shared interest or mutual connection (if any): {shared_context}

- Tone: {professional/friendly/industry-peer}

Write a LinkedIn connection request in Spanish (max 300 characters) that:

1. Addresses them by first name with an appropriate greeting
2. States briefly who I am
3. Gives one genuine, specific reason to connect
4. Ends with a friendly call to action

Also write a slightly longer follow-up message (for after they accept) in Spanish.

Provide: Spanish versions + English translations.

Why it works: Personalised, culturally aware LinkedIn messages in Spanish stand out in feeds dominated by generic English templates.

Prompt 7: The Spanish Proposal Introduction

Title: *Propuesta Poderosa — Spanish Proposal Cover Letter That Opens Doors*

Prompt

You are a bilingual business proposal writer. Help me write a compelling cover letter in Spanish for a business proposal.

Context:

- My company: {your_company_name}
- What we do: {your_value_proposition}
- Client's company: {client_company}
- Project/service being proposed: {project_description}
- Key client pain point: {main_pain_point}
- Key outcome we promise: {promised_outcome}
- Relationship stage: {e.g. new prospect / existing client}
- Tone: {formal/professional/partner-level}

Write a proposal cover letter in Spanish that:

1. Opens with a personalised, respectful greeting
2. Acknowledges the client's challenge or goal
3. Introduces your proposed solution with confidence
4. Highlights the key benefit (not features)
5. Invites them to review the proposal and proposes a review meeting
6. Closes warmly but professionally

Provide: Spanish letter + English translation + subject line options.

Why it works: A Spanish proposal cover letter signals that you've invested effort in the relationship before even discussing price — a powerful trust signal in high-context business cultures.

Prompt 8: The Spanish Apology or Issue Resolution Message

Title: *Disculpa Profesional — Spanish Apology That Saves Relationships*

Prompt

You are a bilingual client relationship expert. Help me write a professional apology or issue-resolution message in Spanish.

Context:

- What went wrong: {description_of_issue}
- Who is affected: {client_name_and_company}
- What I've done or am doing to fix it: {resolution_steps}
- Desired tone: {sincere/formal/empathetic}
- Medium: {email/call script/WhatsApp}

Write a message in Spanish that:

1. Opens with an appropriate, sincere greeting
2. Acknowledges the issue clearly without making excuses
3. Apologises genuinely
4. Explains what action is being taken
5. Reinforces commitment to the relationship
6. Closes with a reassuring sign-off

Provide: Spanish version + English translation + optional follow-up check-in message.

Why it works: How you handle problems in Spanish-speaking business cultures can strengthen relationships more than when things go right. A well-crafted apology demonstrates maturity and respect.

Prompt 9: The Spanish Event or Webinar Invitation

Title: *Invitación Irresistible — Spanish Event Invite That Drives Registrations*

Prompt

You are a bilingual event marketing specialist. Write a compelling event invitation in Spanish for me.

Context:

- Event name: {event_name}
- Event type: {webinar/conference/workshop/networking}
- Date, time, location/platform: {event_details}
- Target audience: {audience_description}
- Key benefit of attending: {main_value_proposition}
- Special guest or feature (if any): {guest_or_feature}
- CTA (register link text): {cta_text}

Write an event invitation in Spanish that:

1. Opens with an engaging, personalised greeting
2. Creates curiosity or excitement about the event
3. Clearly communicates who it is for and the key benefit
4. Includes practical details (date, time, how to join)
5. Has a strong, clear CTA
6. Closes with an enthusiastic sign-off

Provide: Spanish invitation + English translation + subject line for email.

Why it works: Spanish-language event invitations for Spanish-speaking audiences dramatically improve open rates and registrations by removing language barriers and demonstrating cultural investment.

Prompt 10: The Spanish Year-End or Holiday Greeting

Title: *Felicitaciones de Fin de Año — Spanish Holiday Message That Strengthens Business Relationships*

Prompt

You are a bilingual business relationship specialist. Help me write a professional yet warm Spanish year-end or holiday greeting for my business contacts.

Context:

- Type of greeting: {year-end/Christmas/New Year/specific holiday}
- Recipients: {e.g. all clients / key partners / team members}
- Key theme or message for the year: {reflection_or_theme}
- Look ahead (optional): {what you're excited about next year}
- Tone: {warm/professional/celebratory}
- Medium: {email/card/WhatsApp/social media}

Write a holiday greeting in Spanish that:

1. Opens with a festive, culturally appropriate salutation
2. Expresses genuine gratitude for the relationship
3. Briefly reflects on shared achievements or the year's highlights
4. Looks forward to the year ahead with optimism
5. Closes with warm wishes appropriate to the occasion

Provide: Spanish message + English translation + two alternative closing lines (one formal, one warm).

Why it works: Sending personalised holiday greetings in Spanish to Spanish-speaking contacts demonstrates that you value the relationship beyond transactions — a cornerstone of long-term business success in Spanish-speaking markets.

End of Category 04: Spanish Greetings & Communication

Category 05: SEO & Marketing

10 expert-level prompts that help you rank higher on search engines, craft compelling marketing copy, and build campaigns that attract, convert, and retain customers. Each prompt replaces 1–3 hours of research and writing work.

Prompt 1: The SEO Blog Post Optimizer

Title: *Rank-Ready Article Builder — SEO-Optimised Blog Post from Keyword to Publish*

Prompt

You are an expert SEO content strategist with a track record of ranking pages on the first page of Google. Your job is to write a fully optimised blog post for me.

Here is the context:

- Primary keyword: {primary_keyword}
- Secondary/LSI keywords (if any): {secondary_keywords}
- Target audience: {target_audience}
- Search intent (informational/transactional/navigational): {search_intent}
- Competitor URLs to outrank (optional): {competitor_urls}
- Desired word count: {word_count – e.g. 1500, 2500}
- Brand tone of voice: {tone – e.g. authoritative, conversational, expert-friendly}
- CTA at the end: {desired_cta}

Write a blog post that:

1. Has an SEO-optimised H1 title containing the primary keyword naturally
2. Includes a compelling meta description (150–160 characters)
3. Uses proper heading hierarchy (H2s, H3s) with keyword variations
4. Integrates primary and secondary keywords naturally throughout
5. Includes an engaging intro that hooks the reader and addresses search intent
6. Provides genuinely useful, expert-level content (not filler)
7. Has internal linking placeholders: [INTERNAL LINK: topic]
8. Ends with a clear CTA
9. Includes a suggested URL slug

Also provide: a content brief summary and 3 alternative title options.

Why it works: Combines on-page SEO best practices with high-quality writing — the two factors Google consistently rewards with top rankings.

Prompt 2: The Keyword Research Strategist

Title: *Keyword Goldmine — Uncover High-Intent, Low-Competition Keywords for Your Niche*

Prompt

You are an expert SEO keyword researcher with deep knowledge of search intent, keyword clustering, and content gap analysis. Help me build a keyword strategy.

Here is the context:

- My business/website: {business_description}
- My niche or industry: {industry}
- My target audience: {target_audience}
- My main product or service: {main_offering}
- Competitor websites (optional): {competitor_domains}
- Goal: {goal – e.g. drive organic traffic, generate leads, build brand awareness}

Provide:

1. 10 high-intent primary keywords (with estimated monthly search volume range and difficulty level: low/medium/high)
2. 20 long-tail keyword variations (questions, "best X for Y", "how to" style)
3. 5 keyword clusters grouped by topic
4. 3 content gap opportunities my competitors may have missed
5. Recommended content types for each cluster (blog post, landing page, comparison page, etc.)
6. A suggested content calendar order based on difficulty and traffic potential

Format as a structured table where possible.

Why it works: A keyword strategy built around intent and clustering drives compounding organic traffic — far more effective than targeting isolated keywords.

Prompt 3: The Meta Title & Description Generator

Title: *Click Magnet Meta Tags — SEO Titles & Descriptions That Boost Click-Through Rate*

Prompt

You are an expert SEO copywriter specialising in meta tags that maximise click-through rates from Google search results. Your job is to write compelling meta titles and descriptions for my pages.

Here is the context:

- Page type: {blog post/landing page/product page/category page}
- Primary keyword: {primary_keyword}
- Page topic/content summary: {page_summary}
- Target audience: {target_audience}
- Key benefit or unique angle: {key_benefit}
- Brand name: {brand_name}

For each page, write:

1. 3 meta title options (50-60 characters each, primary keyword near the front, compelling hook)
2. 3 meta description options (150-160 characters each, includes keyword, benefit, and CTA)
3. A recommended combination and why it will perform best
4. A power word or emotional trigger used and why it works

Also flag any titles that use click-bait patterns to avoid penalties.

Why it works: A 1% improvement in CTR across your pages compounds into significant traffic gains — and better CTR signals to Google that your content deserves higher rankings.

Prompt 4: The Landing Page Copywriter

Title: *Conversion Machine — High-Converting Landing Page Copy from Scratch*

Prompt

You are a world-class direct response copywriter and conversion rate optimisation (CRO) expert. Your job is to write a high-converting landing page for me.

Here is the context:

- Product/service: {product_or_service}
- Target audience: {target_audience}
- Primary pain point: {main_pain_point}
- Key benefits (top 3): {benefit_1}, {benefit_2}, {benefit_3}
- Social proof available: {testimonials/case studies/logos/stats}
- Offer/CTA: {offer_and_cta}
- Tone: {professional/bold/empathetic/urgent}
- Traffic source (e.g. Google Ads, organic, email): {traffic_source}

Write a full landing page structure with copy for:

1. Hero section: Headline + subheadline + CTA button text
2. Problem section: Agitate the pain point (3-4 sentences)
3. Solution section: Introduce your offer as the answer
4. Benefits section: 3-5 benefit-driven bullet points
5. Social proof section: Template for testimonial placement + stats
6. How it works: 3-step simple process
7. Objection-handling section: FAQ format (3 questions)
8. Final CTA section: Urgency-driven closing statement + CTA

Also provide: A/B test variation for the hero headline.

Why it works: Uses proven direct-response frameworks (AIDA, PAS) combined with CRO principles to turn traffic into customers.

Prompt 5: The Google Ads Copy Creator

Title: *Ad Copy That Converts — Google Search Ads Built for Quality Score & Clicks*

Prompt

You are an expert Google Ads copywriter with deep knowledge of responsive search ads, quality score optimisation, and conversion-focused messaging. Write Google Ads copy for me.

Here is the context:

- Product/service being advertised: {product_or_service}
- Primary keyword being targeted: {primary_keyword}
- Landing page URL (for context): {landing_page_url}
- Target audience: {target_audience}
- Key differentiator / USP: {unique_selling_point}
- Offer or promotion (if any): {offer}
- Goal: {clicks/leads/sales}

Write:

1. 15 headlines (max 30 characters each) – varied to cover features, benefits, CTAs, keywords, and emotional hooks
2. 4 descriptions (max 90 characters each) – focused on benefit + CTA
3. 5 sitelink extensions (title + 2-line description each)
4. 3 callout extensions
5. Recommended headline pinning strategy (which headlines to pin to position 1, 2, 3 and why)

Flag any headlines that may trigger Google's editorial policy.

Why it works: Responsive search ads with diverse, high-quality assets achieve higher Ad Rank and lower cost-per-click — this prompt maximises both.

Prompt 6: The Social Media Content Calendar

Title: *30-Day Content Engine — Social Media Calendar That Builds Audience and Drives Traffic*

Prompt

You are an expert social media strategist and content creator.
Build me a 30-day social media content calendar.

Here is the context:

- Business type: {business_type}
- Target audience: {target_audience}
- Platforms: {platforms – e.g. LinkedIn, Instagram, X/Twitter, Facebook}
- Content goals: {goals – e.g. brand awareness, lead generation,

```
community building}
- Brand tone: {tone – e.g. educational, inspirational, witty,
professional}
- Key topics or themes: {topics}
- Promotions or launches in this period:
{upcoming_events_or_launches}
- Posting frequency per platform: {e.g. LinkedIn: 5x/week,
Instagram: 3x/week}
```

Create a 30-day calendar with:

1. Day-by-day post plan with: Platform | Content type | Topic | Caption hook (first line) | CTA
2. A mix of content types: educational, entertaining, promotional, user-generated, behind-the-scenes (80/20 rule)
3. 5 full caption examples (ready to post)
4. Hashtag strategy: 10 niche hashtags per platform
5. Best posting times per platform based on audience behaviour

Format as a table for easy copying.

Why it works: Consistent, varied content calendars beat sporadic posting every time — algorithms and audiences reward reliability.

Prompt 7: The Email Marketing Sequence Builder

Title: *Nurture to Convert — Email Sequence That Turns Subscribers Into Buyers*

Prompt

You are an expert email marketing strategist and copywriter with experience building high-converting nurture sequences. Build me an email sequence.

Here is the context:

- Product/service: {product_or_service}
- Target audience: {target_audience}
- Where subscribers come from (lead magnet, opt-in, purchase): {lead_source}
- Sequence goal: {goal – e.g. convert to purchase, upsell, onboard, re-engage}
- Number of emails: {e.g. 5, 7, 10}
- Sending cadence: {e.g. daily, every 2 days, weekly}
- Brand tone: {tone}

For each email, provide:

1. Subject line (+ A/B test variant)
2. Preview text (max 90 characters)
3. Email body (full copy, personalisation tokens included)
4. Primary CTA (button text + destination)
5. Purpose of this email in the sequence (e.g. build trust, handle objection, drive urgency)

Also provide:

- Overall sequence strategy and logic
- Recommended send times
- Segmentation suggestions based on open/click behaviour

Why it works: A well-structured email sequence moves subscribers through the buyer journey systematically — far more effective than one-off broadcast emails.

Prompt 8: The SEO Internal Linking Strategy

Title: *Link Architecture Blueprint — Internal Linking Strategy That Boosts Page Authority*

Prompt

You are an expert technical SEO consultant specialising in site architecture and internal linking strategy. Help me build an internal linking plan.

Here is the context:

- Website type: {e.g. blog, e-commerce, SaaS, service business}
- Main topic or niche: {main_topic}
- Pillar pages (your most important pages):
{pillar_page_titles_and_URLs}
- Supporting/cluster content pages: {cluster_page_titles_and_URLs}
- Current SEO issues (if known): {e.g. orphan pages, thin content, poor crawlability}

Provide:

1. A topic cluster map: which cluster pages should link to which pillar pages
2. 10 specific internal link recommendations (from page X → to page Y, with anchor text suggestion)

3. Rules for anchor text variation (exact match, partial match, branded, generic)
4. Advice on link placement (contextual vs footer vs navigation)
5. Pages that may be orphaned and how to fix them
6. A simple crawl priority recommendation for Googlebot

Present as an actionable checklist.

Why it works: Internal linking is one of the highest-ROI SEO activities — it distributes page authority, improves crawlability, and boosts rankings of your most important pages.

Prompt 9: The Competitor Content Gap Analysis

Title: *Outrank the Competition — Content Gap Analysis That Reveals Untapped SEO Opportunities*

Prompt

You are an expert SEO strategist specialising in competitive analysis and content gap identification. Help me find content opportunities my competitors are winning that I'm missing.

Here is the context:

- My website/business: {your_website_and_niche}
- My top 3 competitors: {competitor_1}, {competitor_2}, {competitor_3}
- My current top-performing content (if known): {your_top_content}
- My target audience: {target_audience}
- My primary goal: {goal – e.g. increase organic traffic, capture leads, build authority}

Analyse and provide:

1. 10 topic areas my competitors likely rank for that I should target
2. 5 content formats competitors use that I may be missing (e.g. comparison pages, tools, glossaries)
3. 3 high-intent keyword opportunities that are underserved in my niche
4. Recommendations for differentiating my content (angle, depth, format, multimedia)
5. A prioritised content roadmap: quick wins (low difficulty) vs long-term plays (high value)

6. Suggested content upgrade strategy: how to improve existing content to compete

Present findings with actionable next steps.

Why it works: Closing content gaps puts you in front of audiences already searching for what your competitors offer — capturing traffic and leads you're currently leaving on the table.

Prompt 10: The Brand Messaging & Value Proposition Builder

Title: *Message-Market Fit — Brand Messaging Framework That Resonates and Converts*

Prompt

You are an expert brand strategist and messaging consultant. Help me build a clear, compelling brand messaging framework.

Here is the context:

- Business name: {business_name}
- What we do: {description_of_product_or_service}
- Target audience (be specific): {target_audience}
- Top 3 customer pain points: {pain_1}, {pain_2}, {pain_3}
- Top 3 outcomes/benefits we deliver: {benefit_1}, {benefit_2}, {benefit_3}
- Key differentiators (why choose us over competitors): {differentiators}
- Brand personality (e.g. bold, trustworthy, innovative, approachable): {brand_personality}
- Current tagline (if any): {current_tagline_or_none}

Build a brand messaging framework that includes:

1. One-liner value proposition (one sentence, crystal clear)
2. Elevator pitch (30 seconds, 60-80 words)
3. Hero statement for website homepage (H1 headline + subheadline)
4. 3 brand pillars (core themes that underpin all messaging)
5. Audience-specific messaging variants (for 2 different buyer personas)
6. 5 tagline options (punchy, memorable, on-brand)

7. Words to use / words to avoid (brand voice guide)

Provide a ready-to-use messaging document I can share with my team.

Why it works: Consistent, resonant messaging across all marketing channels reduces friction, builds trust, and improves conversion at every stage of the funnel.

End of Category 05: SEO & Marketing

Category 06: Email Marketing

10 expert-level prompts that help you write emails people actually open, read, and act on — from welcome sequences and newsletters to re-engagement campaigns and promotional blasts. Each prompt replaces 1–3 hours of copywriting work.

Prompt 1: The Welcome Email Sequence

Title: *First Impressions That Stick — Welcome Sequence That Turns New Subscribers Into Loyal Fans*

Prompt

You are an expert email marketing strategist and copywriter. Write a welcome email sequence for new subscribers.

Here is the context:

- Brand/business name: {brand_name}
- What we do: {business_description}
- Lead magnet or reason they subscribed: {lead_magnet_or_opt_in_reason}
- Target audience: {target_audience}
- Ultimate goal of the sequence: {goal — e.g. first purchase, book

a call, join a community}

- Brand tone: {tone – e.g. warm/professional/bold/conversational}
- Number of emails: {3/5/7}
- Sending cadence: {e.g. Day 0, Day 1, Day 3, Day 5, Day 7}

For each email write:

1. Subject line (+ one A/B variant)
2. Preview text (max 90 characters)
3. Full email body with personalisation tokens ({first_name}, etc.)
4. Primary CTA (button text + destination)
5. Email purpose in one sentence

Sequence arc to follow:

- Email 1 (Day 0): Deliver the lead magnet + warm welcome
- Email 2 (Day 1): Share your story / why you do this
- Email 3 (Day 3): Teach something valuable (no pitch)
- Email 4 (Day 5): Social proof + soft offer introduction
- Email 5 (Day 7): Clear CTA to take the next step

Also provide: recommended subject line emoji usage (yes/no) and personalisation strategy.

Why it works: The welcome sequence is the highest-opened email series you'll ever send — getting it right sets the tone for the entire subscriber relationship.

Prompt 2: The Newsletter Issue Writer

Title: *Newsletter That Gets Read — Engaging Issue That Builds Authority and Keeps Subscribers Coming Back*

Prompt

You are an expert newsletter copywriter and content strategist.
Write a complete newsletter issue for me.

Here is the context:

- Newsletter name: {newsletter_name}
- Niche/topic: {niche}
- Target audience: {target_audience}
- Issue theme or main topic: {main_topic}
- Key insight or takeaway: {key_insight}
- Secondary content items (links, tips, tools to feature):

```
{secondary_content}
- Brand tone: {tone}
- CTA for this issue: {cta – e.g. reply, click, buy, share}
- Approximate length: {short ~300 words / medium ~600 words / long
~1000 words}
```

Write a newsletter issue with:

1. Subject line (compelling, curiosity-driven, max 50 characters) + A/B variant
2. Preview text (max 90 characters)
3. Opening hook (2-3 sentences that make them keep reading)
4. Main body: the core insight, story, or framework (well-structured, scannable)
5. Curated section: 2-3 short items (links, tips, tools) with a one-line commentary each
6. Closing: personal sign-off that feels human
7. PS line (often the most-read part – use it for your CTA)

Also provide: a Tweet/LinkedIn post to promote this issue.

Why it works: Great newsletters feel like a message from a trusted friend, not a brand — this structure achieves that balance while still driving action.

Prompt 3: The Promotional Email Blast

Title: *Sell Without Feeling Salesy — Promotional Email That Drives Revenue Without Annoying Your List*

Prompt

You are an expert direct response email copywriter. Write a promotional email for a sale, launch, or limited-time offer.

Here is the context:

- Product/service being promoted: {product_or_service}
- Offer details (discount, bonus, deadline): {offer_details}
- Target audience: {target_audience}
- Key benefit of the offer: {main_benefit}
- Primary objection to address: {main_objection}
- Urgency/scarcity element: {urgency – e.g. "48 hours only", "limited spots", "price goes up Friday"}
- CTA destination: {landing_page_or_checkout_url_placeholder}

- Brand tone: {tone}

Write a promotional email that:

1. Subject line: creates urgency or curiosity without clickbait (+ A/B variant)
2. Preview text: teases the offer (max 90 characters)
3. Opens with a story, question, or bold statement – NOT "I'm excited to announce"
4. Bridges the story to the offer naturally
5. Presents the offer clearly (what it is, what's included, the price, the deadline)
6. Handles the main objection in 1-2 sentences
7. Includes 2 CTA placements (mid-email and end)
8. Closes with urgency reminder

Also provide: a 3-email mini-sequence (announcement → reminder → last chance) subject lines.

Why it works: Promotional emails fail when they lead with the offer. This structure leads with relevance and lets the offer land as a natural conclusion.

Prompt 4: The Re-Engagement Campaign

Title: *Win-Back Machine — Re-Engagement Sequence That Reactivates Cold Subscribers*

Prompt

You are an expert email deliverability and re-engagement specialist. Write a win-back campaign for inactive subscribers.

Here is the context:

- Brand/business: {brand_name}
- Definition of "inactive": {e.g. no opens in 90 days / no purchase in 6 months}
- Segment size (for tone calibration): {e.g. small VIP list / large cold list}
- Best offer or incentive you can provide: {incentive – e.g. discount, free resource, exclusive content}
- Brand tone: {tone}
- Final action if no re-engagement: {e.g. unsubscribe them / move to a separate list}

Write a 3-email re-engagement sequence:

Email 1 – "We miss you" (soft, curiosity-driven)

Email 2 – "Here's something for you" (value or offer)

Email 3 – "Last chance to stay" (honest, low-pressure)

For each email:

1. Subject line (pattern interrupt – different from normal emails) + A/B variant
2. Preview text
3. Full email body (short, human, direct)
4. CTA

Also provide:

- Recommended send cadence (days between emails)
- List hygiene recommendation after the sequence completes
- Suppression strategy to protect deliverability

Why it works: Re-engagement campaigns recover revenue from your existing list — often the highest-ROI email activity with zero acquisition cost.

Prompt 5: The Abandoned Cart Email Sequence

Title: *Cart Recovery Sequence — Emails That Bring Back Lost Buyers Before They're Gone for Good*

Prompt

You are an expert e-commerce email strategist specialising in cart abandonment recovery. Write an abandoned cart email sequence.

Here is the context:

- Brand/store name: {brand_name}
- Product(s) typically abandoned: {product_category_or_example}
- Average cart value: {average_cart_value}
- Incentive available (if any): {incentive – e.g. 10% off, free shipping, none}
- Brand tone: {tone – e.g. friendly/urgent/premium}
- Sequence length: {2 or 3 emails}

Write the sequence:

Email 1 (1 hour after abandonment): Gentle reminder
Email 2 (24 hours after abandonment): Address objections + social proof
Email 3 (48–72 hours, optional): Last chance + incentive (if available)

For each email:

1. Subject line (personalised with product name if possible) + A/B variant
2. Preview text
3. Full email body
4. CTA button text
5. Dynamic content suggestions (product image placeholder, cart summary, etc.)

Also provide:

- Recommended trigger and timing logic
- SMS follow-up suggestion for Email 1
- A/B test idea for the incentive email

Why it works: Abandoned cart emails recover 5–15% of lost revenue on average — a 3-email sequence consistently outperforms a single reminder.

Prompt 6: The Post-Purchase Email Sequence

Title: *Buyer to Brand Advocate — Post-Purchase Sequence That Drives Retention, Reviews, and Referrals*

Prompt

You are an expert customer lifecycle email strategist. Write a post-purchase email sequence that maximises customer lifetime value.

Here is the context:

- Brand/business: {brand_name}
- Product/service purchased: {product_or_service}
- Delivery/onboarding timeline: {e.g. physical product ships in 3 days / digital delivered immediately}
- Goal of the sequence: {e.g. drive repeat purchase, get a review, encourage referral, reduce churn}

- Upsell/cross-sell opportunity (if any):
{upsell_product_or_service}
- Brand tone: {tone}

Write a 4-email post-purchase sequence:

Email 1 (Immediate): Order confirmation + expectation setting

Email 2 (Day 2-3): Onboarding / how to get the most from your purchase

Email 3 (Day 7): Check-in + review request

Email 4 (Day 14-21): Referral or upsell offer

For each email:

1. Subject line + A/B variant
2. Preview text
3. Full email body
4. CTA

Also provide:

- Strategy note for each email explaining its role in the sequence
- Recommended review platform and ask timing
- Referral incentive suggestion

Why it works: The post-purchase window is when trust is highest — a strategic sequence turns one-time buyers into repeat customers and advocates.

Prompt 7: The Cold Email Outreach Sequence

Title: *Cold Email That Gets Replies — Outreach Sequence Built on Relevance, Not Volume*

Prompt

You are an expert B2B cold email strategist with a track record of 20%+ reply rates. Write a cold email outreach sequence for me.

Here is the context:

- My name and company: {your_name_and_company}
- What we do (one sentence): {value_proposition}
- Target prospect (role, industry, company size):
{prospect_profile}
- Pain point we solve: {pain_point}

- Social proof or credibility signal: {proof – e.g. "We've helped X companies achieve Y"}
- Desired CTA: {cta – e.g. 15-min call, reply to this email, watch a demo}
- Sequence length: {3 or 5 emails}

Write the sequence:

Email 1: Hyper-personalised opener (short, curiosity-driven, no pitch dump)

Email 2 (Day 3): Add value (insight, resource, or relevant case study)

Email 3 (Day 7): Soft follow-up (reference email 1, restate value)

Email 4 (Day 14): Different angle or objection-handling

Email 5 (Day 21): Breakup email (permission to close the loop)

For each email:

1. Subject line (max 7 words, no spam triggers) + A/B variant
2. Full email body (max 150 words per email)
3. CTA
4. Personalisation placeholder: [{personalisation_hook}] for each email

Also provide: spam word list to avoid and deliverability checklist.

Why it works: Short, relevant, sequenced cold emails dramatically outperform long-form one-shot blasts — this structure respects the prospect's time while building familiarity.

Prompt 8: The Event or Webinar Email Sequence

Title: *Fill Your Event — Email Sequence That Maximises Registrations, Attendance, and Follow-Up Conversions*

Prompt

You are an expert event marketing email strategist. Write a full email sequence for a webinar or live event.

Here is the context:

- Event name: {event_name}
- Event type: {webinar/workshop/summit/live event}

- Event date and time: {date_and_time}
- Topic and key takeaways: {topic_and_takeaways}
- Target audience: {target_audience}
- Speaker(s): {speaker_names_and_credentials}
- Registration link: {registration_url_placeholder}
- Post-event offer (if any): {offer}

Write the full sequence:

Pre-event:

- Announcement email (2 weeks out)
- Reminder email (3 days out)
- Day-before reminder
- Day-of reminder (morning)

Post-event:

- Thank you + replay link (attendees)
- Missed you + replay link (no-shows)
- Follow-up offer email (2 days after)

For each email:

1. Subject line + A/B variant
2. Preview text
3. Full email body
4. CTA

Also provide: recommended send times and segmentation logic (registered vs attended vs no-show).

Why it works: Most event hosts send one reminder. A full pre/post sequence can double attendance rates and triple post-event conversions.

Prompt 9: The Email Subject Line Generator

Title: *Open Rate Booster — 30 Subject Lines That Get Emails Opened Across Any Campaign Type*

Prompt

You are an expert email subject line copywriter with deep knowledge of open rate psychology, spam filters, and A/B testing. Generate high-performing subject lines for me.

Here is the context:

- Email campaign type: {welcome/newsletter/promotional/re-engagement/cold outreach/post-purchase}
- Email topic or offer: {topic_or_offer}
- Target audience: {target_audience}
- Brand tone: {tone – e.g. professional/playful/urgent/empathetic}
- Desired emotion to trigger: {emotion – e.g. curiosity/urgency/FOMO/excitement/trust}

Generate 30 subject lines grouped by type:

1. Curiosity-gap (5 examples)
2. Urgency/scarcity (5 examples)
3. Personalisation-driven (5 examples – use {first_name} or context)
4. Number/list-based (5 examples)
5. Question-based (5 examples)
6. Bold/contrarian statement (5 examples)

For each group:

- Label the psychological trigger being used
- Flag any that may trigger spam filters
- Star your top 3 overall recommendations

Also provide: emoji usage guidance (when to use, which ones convert best for this audience).

Why it works: Subject lines determine whether your email gets opened or ignored — testing across multiple frameworks reveals what resonates with your specific audience.

Prompt 10: The Email List Segmentation Strategy

Title: *Right Message, Right Person — Segmentation Strategy That Boosts Engagement and Revenue*

Prompt

You are an expert email marketing strategist specialising in list segmentation and personalisation. Help me build a segmentation strategy for my email list.

Here is the context:

- Business type: {e.g. e-commerce, SaaS, service business, creator/info-product}
- Email platform: {e.g. Klaviyo, Mailchimp, ActiveCampaign, ConvertKit, HubSpot}
- List size: {approximate_number}
- Current segmentation (if any): {current_segments_or_none}
- Available data points: {e.g. purchase history, signup source, engagement level, location, tags}
- Goals: {goals – e.g. increase open rates, reduce unsubscribes, drive repeat purchases}

Provide:

1. 5–8 recommended segments with names, criteria, and purpose
2. For each segment: recommended email frequency, content type, and tone
3. Behavioural segmentation triggers to set up (e.g. clicked X, purchased Y, visited Z)
4. Engagement-based segments: Active / Warm / Cold / Dormant definitions and strategy for each
5. Quick-win segmentation action to implement this week
6. Re-permission campaign strategy for contacts with unknown consent status

Present as an actionable implementation guide with platform-agnostic logic.

Why it works: Segmented campaigns generate up to 760% more revenue than batch-and-blast emails — the right message to the right person at the right time is the foundation of email marketing success.

End of Category 06: Email Marketing

Category 07: Social Media Management

10 expert-level prompts that help you plan, create, and optimise social media content across platforms — from crafting viral posts and managing your brand

voice to analysing competitors and building engaged communities. Each prompt replaces 1–3 hours of strategy and writing work.

Prompt 1: The Viral Post Formula

Title: *Scroll Stopper — Social Media Post Engineered for Maximum Reach and Engagement*

Prompt

You are an expert social media copywriter who specialises in creating high-engagement, shareable content. Write a viral-optimised post for me.

Here is the context:

- Platform: {LinkedIn/Instagram/X (Twitter)/Facebook/TikTok}
- Topic or insight to share: {topic_or_insight}
- Target audience: {target_audience}
- Content goal: {goal – e.g. grow followers, drive profile visits, spark conversation, increase shares}
- Brand tone: {tone – e.g. bold/educational/inspirational/witty/authoritative}
- Hook style preferred: {e.g. controversial take/surprising stat/personal story/listicle/question}

Write a post that includes:

1. Hook (first line – must stop the scroll; max 12 words)
2. Body (delivers on the hook's promise with value, story, or insight)
3. Engagement trigger (question, poll suggestion, or CTA that drives comments)
4. Hashtag recommendations (platform-appropriate, niche + broad mix)
5. Optimal posting time recommendation for this platform and audience

Also provide:

- 3 alternative hooks for A/B testing
- A short-form video script version (for Reels/TikTok/Shorts) of

the same idea

- One visual/image direction suggestion

Why it works: The first line determines everything on social media — this framework front-loads the hook and engineers shareability at every stage of the post.

Prompt 2: The LinkedIn Thought Leadership Post

Title: *LinkedIn Authority Builder — Long-Form Post That Grows Your Following and Builds Expert Status*

Prompt

You are an expert LinkedIn content strategist and ghostwriter who specialises in thought leadership content. Write a high-performing LinkedIn post for me.

Here is the context:

- My name and role: {your_name_and_role}
- Industry/niche: {industry}
- Topic or personal insight: {topic}
- Audience (who follows me or who I want to attract): {target_audience}
- Tone: {professional/conversational/bold/reflective}
- Key takeaway I want readers to leave with: {key_takeaway}
- Personal story or experience to anchor it (optional): {personal_story_or_none}

Write a LinkedIn post that:

1. Opens with a pattern-interrupt hook (no "I'm excited to share" openers)
2. Tells a brief story or shares a counterintuitive insight
3. Delivers 3-5 actionable lessons or observations (formatted for scannability)
4. Closes with a thought-provoking question to drive comments
5. Is between 900-1,300 characters for optimal reach

Also provide:

- A carousel outline (5-7 slides) repurposing the same content
- 3 hashtags (1 niche, 1 industry, 1 broad)
- Best day and time to post based on LinkedIn algorithm patterns

Why it works: LinkedIn rewards dwell time and comments — a well-structured thought leadership post triggers both and signals the algorithm to distribute it widely.

Prompt 3: The Instagram Caption Writer

Title: *Caption That Converts — Instagram Copy That Stops the Scroll, Builds Connection, and Drives Action*

Prompt

You are an expert Instagram copywriter and brand storyteller. Write an Instagram caption for me.

Here is the context:

- Brand/account type: {personal brand/business/e-commerce/creator}
- Post visual description: {describe the image or video}
- Campaign or content theme: {theme – e.g. product launch, behind the scenes, educational, lifestyle}
- Target audience: {target_audience}
- Brand tone: {tone – e.g. warm/bold/minimalist/playful/luxurious}
- Goal of this post: {goal – e.g. drive saves, increase comments, click link in bio, build brand love}
- CTA: {desired_action}

Write an Instagram caption that:

1. Opens with a hook in the first line (visible before "more" is tapped)
2. Tells a micro-story or delivers a valuable insight in 3-5 sentences
3. Connects the visual to the message naturally
4. Includes a clear, low-friction CTA
5. Closes with 5-10 hashtags (mix of niche, community, and broad – no banned tags)

Also provide:

- A shorter version (for Stories text overlay)
- A longer version (for carousel educational posts)
- 3 reel hook scripts (first 3 seconds) based on the same content

Why it works: Most Instagram captions either ignore the hook or ignore the CTA — this framework does both, maximising both engagement and conversion.

Prompt 4: The Social Media Brand Voice Guide

Title: *Sound Like You — Brand Voice Framework That Keeps Every Post On-Brand Across Every Platform*

Prompt

You are an expert brand strategist and social media consultant. Help me define and document my brand voice for social media.

Here is the context:

- Brand/business name: {brand_name}
- What we do: {business_description}
- Target audience: {target_audience}
- 3 words that describe our brand personality: {word_1}, {word_2}, {word_3}
- 3 words we never want to be perceived as: {not_word_1}, {not_word_2}, {not_word_3}
- Brands whose voice we admire (any industry): {brand_examples}
- Platforms we're active on: {platforms}
- Content types we post most: {content_types}

Create a brand voice guide that includes:

1. Brand personality summary (3-4 sentences)
2. Voice dimensions: 4 traits with descriptions and do/don't examples each
3. Vocabulary guide: words/phrases to use vs avoid
4. Tone variations by platform (how voice adapts for LinkedIn vs Instagram vs X)
5. Tone variations by content type (educational vs promotional vs community vs crisis)
6. 3 example posts showing the voice in action across different scenarios
7. A "does this sound like us?" checklist (5 yes/no questions for content review)

Format as a shareable document ready to give to a social media manager or VA.

Why it works: Inconsistent brand voice erodes trust and confuses algorithms. A clear voice guide enables anyone on your team to post on-brand without oversight.

Prompt 5: The Competitor Social Media Analysis

Title: *Spy & Strategise — Competitor Social Media Audit That Reveals Gaps and Winning Tactics*

Prompt

You are an expert social media analyst and competitive intelligence specialist. Help me audit my competitors' social media presence.

Here is the context:

- My business/brand: {your_brand_and_niche}
- Competitors to analyse: {competitor_1}, {competitor_2}, {competitor_3}
- Platforms to focus on: {platforms}
- My current social media weakness: {weakness – e.g. low engagement, poor reach, no video content}
- My goal: {goal – e.g. grow faster, steal audience share, differentiate content}

Analyse and provide:

1. Content mix breakdown: what types of content each competitor posts most (estimate %)
2. Posting frequency and best-performing formats for each competitor
3. Engagement patterns: what topics/formats get the most comments, shares, saves
4. Content gaps: topics or formats they're NOT covering that I could own
5. Tone and positioning comparison: how each brand positions itself
6. 3 winning tactics I should steal and adapt (ethically)
7. 3 things they do that I should deliberately NOT do (differentiation opportunities)
8. A 30-day "competitive counter-strategy" content plan outline

Present as an actionable audit report with clear recommendations.

Why it works: Most businesses create content in a vacuum. Understanding what's working for competitors — and where the gaps are — removes guesswork and accelerates growth.

Prompt 6: The Community Engagement Playbook

Title: *Community Builder — Engagement Strategy That Turns Followers Into an Active, Loyal Community*

Prompt

You are an expert community manager and social media growth strategist. Help me build an engagement strategy that grows a loyal community.

Here is the context:

- Brand/account: {brand_name}
- Platform(s): {platforms}
- Current follower count and engagement rate: {current_metrics}
- Target audience: {target_audience}
- Community goal: {goal — e.g. drive word-of-mouth, build brand loyalty, generate UGC, reduce churn}
- Resources available: {e.g. 1 hour/day, VA support, budget for giveaways}

Build a community engagement playbook that includes:

1. Daily engagement routine (15-30 min actions: what to do, in what order)
2. Weekly engagement activities (deeper community-building actions)
3. Monthly community events or initiatives (challenges, AMAs, features, etc.)
4. Response templates for: positive comments, negative comments, DMs, and mentions
5. UGC (user-generated content) strategy: how to encourage, curate, and reshare
6. Community recognition tactics: how to spotlight and reward active members
7. Metrics to track weekly (beyond vanity metrics)

Format as a repeatable playbook with daily/weekly/monthly checklists.

Why it works: Algorithmic reach is unreliable — community is the moat. A structured engagement playbook turns passive followers into advocates who amplify your content organically.

Prompt 7: The Short-Form Video Script Writer

Title: *Hook, Hold, Convert — Short-Form Video Script for Reels, TikTok, and YouTube Shorts*

Prompt

You are an expert short-form video scriptwriter and content strategist for platforms like TikTok, Instagram Reels, and YouTube Shorts. Write a video script for me.

Here is the context:

- Platform: {TikTok/Instagram Reels/YouTube Shorts}
- Topic: {video_topic}
- Target audience: {target_audience}
- Goal: {goal – e.g. grow followers, educate, sell, go viral, drive profile visits}
- Video length: {15s / 30s / 60s}
- Brand tone: {tone}
- CTA at end: {cta}

Write a script that includes:

1. Hook (0-3 seconds): visual action + spoken line that stops the scroll
2. Setup (3-10 seconds): context or problem framing
3. Payoff (10-50 seconds): the value, insight, tutorial, or story
4. CTA (last 3-5 seconds): clear, single action

For each section include:

- Spoken script (word-for-word)
- On-screen text suggestions
- Visual/action direction
- Pacing notes (fast cut / slow / zoom / transition)

Also provide:

- 3 alternative hooks for split testing
- Caption for the post (with hashtags)
- Thumbnail/cover frame suggestion

Why it works: Short-form video success is 80% determined in the first 3 seconds — this framework engineers the hook first and builds everything else around retaining attention.

Prompt 8: The Social Media Crisis Response Plan

Title: *Damage Control — Crisis Communication Framework for Social Media Incidents*

Prompt

You are an expert social media crisis communications specialist. Help me build a response plan for social media incidents.

Here is the context:

- Brand/business: {brand_name}
- Industry: {industry}
- Type of crisis to plan for: {crisis_type – e.g. negative viral post, product failure, employee misconduct, data breach, PR controversy}
- Brand values to uphold: {core_values}
- Key stakeholders (customers, partners, press): {stakeholders}
- Communication channels available: {channels – e.g. Twitter, Instagram, LinkedIn, press release, email}

Build a crisis response plan that includes:

1. Crisis severity tiers (Tier 1/2/3) with definitions and examples for my business
2. First-response protocol: what to do in the first 60 minutes
3. Holding statement template (acknowledge without admitting before facts are known)
4. Full public response templates for each crisis type listed
5. Internal escalation checklist (who to notify, in what order)
6. What NOT to say / do (common mistakes that escalate crises)
7. Post-crisis reputation recovery content plan (Week 1 and Week 2)
8. Monitoring keywords to track during a crisis

Format as a ready-to-use playbook that can be activated immediately.

Why it works: How a brand responds in the first hour of a social media crisis often determines whether it becomes a footnote or a reputation-ending event — preparation is everything.

Prompt 9: The Social Media Audit & Strategy Reset

Title: *Full Account Audit — Social Media Health Check and 90-Day Growth Strategy*

Prompt

You are an expert social media strategist and growth consultant. Conduct a full audit of my social media presence and recommend a 90-day strategy.

Here is the context:

- Brand/account: {brand_name}
- Platforms active on: {platforms}
- Current metrics (approximate): {followers, avg engagement rate, post frequency}
- Best-performing content to date (if known): {top_performing_content}
- Current goals: {goals}
- Resources: {team size, time per week, budget for ads/tools}
- Biggest frustration with current social media: {frustration}

Provide a full audit and strategy including:

1. Platform-by-platform assessment: strengths, weaknesses, opportunities
2. Content audit: what's working, what's not, what to stop/start/continue
3. Profile optimisation checklist: bio, links, highlights, profile photo, keywords
4. 90-day growth strategy: Month 1 (foundation), Month 2 (momentum), Month 3 (scale)
5. Weekly content cadence recommendation per platform
6. Quick wins: 5 things to do this week that will show results within 30 days
7. KPIs to track: what to measure, how often, and what benchmarks to aim for
8. Tool stack recommendation (scheduling, analytics, design) – free and paid options

Present as a consultant-style strategy document.

Why it works: Most brands post without a strategy. An audit-first approach identifies what's actually working and builds a data-informed plan — not guesswork.

Prompt 10: The User-Generated Content (UGC) Campaign Builder

Title: *Let Your Customers Do the Talking — UGC Campaign That Generates Social Proof at Scale*

Prompt

You are an expert user-generated content strategist and social media campaign manager. Build a UGC campaign for me.

Here is the context:

- Brand/business: {brand_name}
- Product or service: {product_or_service}
- Target audience: {target_audience}
- Platforms: {platforms}
- Campaign goal: {goal – e.g. increase social proof, drive awareness, generate content assets, boost sales}
- Incentive available: {incentive – e.g. feature on our page, discount, prize, affiliate commission, none}
- Campaign duration: {e.g. 2 weeks, 1 month, ongoing}

Build a UGC campaign plan that includes:

1. Campaign concept and name (memorable, on-brand, easy to participate in)
2. Hashtag strategy: branded hashtag + community hashtag
3. Participation mechanic: exactly what you're asking customers to do (simple, specific)
4. Launch announcement post (caption + visual direction) for each platform
5. Outreach templates: DM or email asking existing customers to participate
6. Content moderation guidelines: what to reshare, what to avoid
7. Legal/permissions best practice (how to get rights to reshare UGC)
8. Amplification strategy: how to fuel the campaign once it launches
9. Success metrics: what to measure to call the campaign a win

Also provide: a follow-up sequence to keep UGC momentum going after the initial launch.

Why it works: UGC is the most trusted form of social proof — 79% of consumers say it highly impacts their purchase decisions. A structured campaign generates it consistently rather than waiting for it to happen organically.

End of Category 07: Social Media Management

Category 08: Business Strategy & Planning

***10 expert-level prompts** that help you set direction, make smarter decisions, and build plans that actually get executed — from annual strategy and competitive positioning to pricing models and growth frameworks. Each prompt replaces hours of consulting, research, and planning work.*

Prompt 1: The Annual Business Strategy Builder

Title: *North Star Plan — Annual Business Strategy That Aligns Your Team and Drives Focused Growth*

Prompt

You are an expert business strategist and executive coach. Help me build a clear, actionable annual business strategy.

Here is the context:

- Business name and type: {business_name_and_type}
- Current revenue and team size: {revenue_and_team_size}
- Industry/niche: {industry}
- Last year's biggest wins: {wins}
- Last year's biggest challenges or failures: {challenges}
- Top 3 opportunities I see for this year: {opportunities}
- Top 3 threats or risks I'm facing: {threats}
- 12-month revenue goal: {revenue_goal}

- Other key goals (team, product, brand, operations): {other_goals}

Build a 12-month strategy document that includes:

1. Mission reminder and annual theme (a unifying phrase for the year)
2. SWOT summary with strategic implications
3. 3 strategic pillars for the year (the main areas of focus)
4. Quarterly OKRs (Objectives and Key Results) – one objective per pillar per quarter
5. Key initiatives: 5-7 projects or campaigns that will drive the year's goals
6. Resource allocation guidance: where to invest time, money, and people
7. Risks and mitigation plans for the top 3 threats
8. Monthly review cadence: what to measure, what decisions to make each month

Format as an executive strategy document ready to present to a team or board.

Why it works: Most businesses plan reactively. A structured annual strategy creates alignment, accountability, and a clear filter for deciding what to pursue — and what to ignore.

Prompt 2: The Competitive Positioning Framework

Title: *Own Your Lane — Competitive Positioning Strategy That Makes You the Obvious Choice*

Prompt

You are an expert brand strategist and competitive positioning consultant. Help me define a differentiated market position.

Here is the context:

- Business/brand: {business_name}
- Product or service: {product_or_service}
- Target audience (be specific): {target_audience}
- Top 3 competitors: {competitor_1}, {competitor_2}, {competitor_3}
- What competitors do well: {competitor_strengths}
- Where competitors fall short (customer complaints, gaps): {competitor_weaknesses}

- My current strengths: {your_strengths}
- My current weaknesses: {your_weaknesses}
- What I want to be known for: {desired_reputation}

Build a competitive positioning framework that includes:

1. Positioning statement (classic format: "For [audience] who [need], [brand] is the [category] that [benefit] because [reason to believe]")
2. Competitive landscape map: where each competitor sits on 2 key axes (suggest the axes)
3. Your "white space" opportunity: the unoccupied position you can own
4. 3 proof points that support your positioning (facts, results, credentials)
5. How to communicate the positioning across: website headline, elevator pitch, sales conversations, ads
6. Positioning pitfalls to avoid (common mistakes in your category)
7. A differentiation test: 5 questions to pressure-test whether your positioning is truly unique

Present as a positioning document ready for internal alignment and external messaging.

Why it works: Without a clear position, you compete on price. With one, you compete on value — this framework carves out defensible territory in even crowded markets.

Prompt 3: The Business Model Canvas Builder

Title: *Blueprint Your Business — Business Model Canvas That Reveals How You Create, Deliver, and Capture Value*

Prompt

You are an expert business model strategist familiar with the Business Model Canvas (Osterwalder) and lean startup methodologies. Help me build and stress-test my business model.

Here is the context:

- Business name and stage: {business_name_and_stage – e.g. idea, early revenue, scaling}
- Core product or service: {product_or_service}
- Target customer segments: {customer_segments}

- Current revenue model: {how_you_make_money}
- Key resources available: {resources – people, IP, technology, capital}
- Existing partnerships: {partnerships_or_none}

Build a complete Business Model Canvas with detailed analysis for each block:

1. Customer Segments: who exactly, segmented and prioritised
2. Value Propositions: what problem you solve and why customers choose you
3. Channels: how you reach and deliver to customers
4. Customer Relationships: how you acquire, retain, and grow customers
5. Revenue Streams: all current and potential revenue models with pricing logic
6. Key Resources: what you must have to deliver the value proposition
7. Key Activities: the most critical things you must do well
8. Key Partnerships: who you need and what you get from them
9. Cost Structure: major cost drivers and fixed vs variable split

Then provide:

- 3 business model risks and how to mitigate them
- 2 alternative revenue stream ideas to explore
- One pivot option if the primary model underperforms

Why it works: The Business Model Canvas forces clarity on how every part of the business fits together — and reveals misalignments before they become expensive mistakes.

Prompt 4: The Pricing Strategy Architect

Title: *Price for Profit — Pricing Strategy That Maximises Revenue Without Losing Customers*

Prompt

You are an expert pricing strategist with experience across SaaS, services, e-commerce, and info-products. Help me build an optimised pricing strategy.

Here is the context:

- Business type: {business_type}
- Product/service: {product_or_service}
- Target audience: {target_audience}
- Current pricing (if any): {current_price_or_none}
- Cost to deliver (COGS or time cost): {cost_to_deliver}
- Competitor pricing: {competitor_pricing}
- Perceived value by customers: {how_customers_describe_the_value}
- Revenue goal: {monthly_or_annual_revenue_goal}
- Pricing model preference (if any): {e.g. flat fee/subscription/tiered/value-based/freemium}

Build a pricing strategy that includes:

1. Recommended pricing model with rationale
2. Price point recommendation with justification (cost-plus, competitor-based, and value-based analysis)
3. Tiered pricing structure (3 tiers: entry, core, premium) with what's included at each level
4. Psychological pricing tactics relevant to my audience and market
5. Packaging recommendations: how to bundle for higher average order value
6. Discount policy: when to discount, how much, and guardrails to protect margins
7. Price increase strategy: how and when to raise prices without losing customers
8. Annual vs monthly pricing logic (if subscription-based)

Also provide: a simple pricing page copy outline based on the recommended structure.

Why it works: Most businesses underprice out of fear. A structured pricing strategy anchors decisions in value and data — often revealing that the market will pay significantly more.

Prompt 5: The Go-To-Market Plan Builder

Title: *Launch With Precision — Go-To-Market Plan That Gets Your Product or Service in Front of the Right People Fast*

Prompt

You are an expert go-to-market strategist with experience launching products and services across B2B and B2C markets. Build a GTM plan

for me.

Here is the context:

- Product/service being launched: {product_or_service}
- Target customer: {ideal_customer_profile}
- Launch date or timeline: {launch_date_or_timeline}
- Budget available for launch: {budget}
- Team size: {team_size}
- Distribution channels available: {channels – e.g. email list, social media, paid ads, partnerships, sales team}
- Key differentiator: {main_usp}
- Launch goal: {goal – e.g. first 100 customers, \$X revenue, waitlist signups, press coverage}

Build a GTM plan with:

1. Target audience definition: ICP (Ideal Customer Profile) with demographics, psychographics, and buying triggers
2. Positioning and messaging for launch: headline, tagline, key messages per audience segment
3. Channel strategy: which channels to prioritise, why, and in what order
4. Pre-launch phase (4 weeks before): activities to build anticipation and collect leads
5. Launch week playbook: day-by-day actions across each channel
6. Post-launch phase (weeks 2-4): follow-up, conversion, and optimisation activities
7. Launch metrics: what success looks like at Day 7, Day 30, Day 90
8. Risk scenarios: top 3 things that could go wrong and contingency plans

Format as a launch playbook with a timeline and owner assignments.

Why it works: Successful launches are won in the preparation phase. A structured GTM plan eliminates the "spray and pray" approach and concentrates resources where they'll have the most impact.

Prompt 6: The OKR & Goal-Setting Framework

Title: *Goals That Get Done — OKR Framework That Turns Ambition Into Measurable Results*

Prompt

You are an expert OKR (Objectives and Key Results) coach and performance strategist. Help me set and structure goals using the OKR framework.

Here is the context:

- Business/team: {business_or_team_name}
- Planning period: {quarter/half-year/annual}
- Business stage: {e.g. early-stage startup/growth/mature}
- Top priorities for this period: {top_3_priorities}
- Current biggest bottleneck to growth: {bottleneck}
- Team size and departments: {team_structure}
- Revenue goal for the period: {revenue_goal}

Build an OKR framework that includes:

1. Company-level OKRs: 3 objectives, each with 3–4 measurable key results
2. Department/team-level OKRs: cascaded from company OKRs (for up to 3 teams)
3. Individual-level OKR guidance: how to set personal OKRs that align upward
4. Grading rubric: how to score key results at end of period (0.0–1.0 scale)
5. Cadence recommendation: weekly check-in format, monthly review agenda, quarterly retrospective structure
6. Common OKR mistakes to avoid (with examples)
7. 5 questions to pressure-test each key result before committing

Also provide: a one-page OKR template (text-based) ready to fill in for each team.

Why it works: OKRs work when they're ambitious but measurable, cascaded but not micromanaged, and reviewed consistently — this framework ensures all three conditions are met.

Prompt 7: The SWOT Analysis & Strategic Action Plan

Title: *Clarity Under Pressure — Deep SWOT Analysis With a Strategic Action Plan Built In*

Prompt

You are an expert strategic planning consultant. Conduct a thorough SWOT analysis and build a strategic action plan from it.

Here is the context:

- Business/brand: {business_name}
- Industry and current market conditions: {industry_and_market_context}
- Business stage: {stage}
- Internal strengths I believe we have: {strengths}
- Internal weaknesses I know we have: {weaknesses}
- External opportunities I can see: {opportunities}
- External threats I'm aware of: {threats}
- My most urgent business challenge right now: {urgent_challenge}

Produce a full SWOT analysis that includes:

1. Refined SWOT matrix: pressure-tested and expanded strengths, weaknesses, opportunities, threats (push back if any are vague)
2. Strategic implications for each quadrant: what does this mean for my business?
3. SO Strategies: how to use strengths to capture opportunities (2-3 strategies)
4. ST Strategies: how to use strengths to neutralise threats (2-3 strategies)
5. WO Strategies: how to fix weaknesses to capture opportunities (2-3 strategies)
6. WT Strategies: how to minimise weaknesses and avoid threats (2-3 strategies)
7. Priority action plan: top 5 actions to take in the next 90 days, ranked by impact
8. One decision I need to make that I may be avoiding – and why I should make it now

Present as a strategic planning document with clear, decisive recommendations.

Why it works: A SWOT is only valuable if it leads to strategy. Most stop at the matrix — this framework forces the strategic translation that turns insight into action.

Prompt 8: The Business Growth Diagnostic

Title: *Find the Leak — Business Growth Diagnostic That Identifies Exactly What's Holding You Back*

Prompt

You are an expert business growth consultant and diagnostician. Help me identify the root causes of slow or stalled growth.

Here is the context:

- Business type and stage: {business_type_and_stage}
- Current monthly revenue and growth rate: {revenue_and_growth_rate}
- Target growth rate: {target_growth}
- Current customer acquisition channels: {channels}
- Customer acquisition cost (if known): {cac}
- Customer lifetime value (if known): {ltv}
- Monthly churn rate (if applicable): {churn}
- Team bottlenecks: {team_issues}
- What I've already tried to accelerate growth: {tried_solutions}

Conduct a growth diagnostic that covers:

1. Revenue levers analysis: acquisition, activation, retention, referral, revenue (AARRR framework applied to my business)
2. Bottleneck identification: where is the biggest constraint in my growth engine?
3. Unit economics health check: is the business model fundamentally sound?
4. Channel audit: which channels have the best ROI and which are draining resources?
5. Churn analysis: if applicable, what's driving it and how to reduce it?
6. Quick wins: 3 actions that could unlock growth within 30 days
7. Strategic bets: 2 higher-risk, higher-reward plays worth exploring in the next 6 months
8. The one question I should be obsessing over but probably aren't

Present findings as a diagnostic report with ranked recommendations.

Why it works: Growth problems are rarely where founders think they are. A systematic diagnostic reveals the true constraint — so you fix the right thing instead of the most visible one.

Prompt 9: The Strategic Partnership Proposal

Title: *Win-Win Deals — Strategic Partnership Proposal That Gets a Yes From the Right Partners*

Prompt

You are an expert business development strategist and partnership negotiator. Help me build a compelling strategic partnership proposal.

Here is the context:

- My business: {your_business_name_and_description}
- Target partner: {partner_name_and_description}
- Why this partnership makes sense: {strategic_rationale}
- What I bring to the partnership: {your_value}
- What I want from the partnership: {desired_outcome}
- Partnership model in mind: {e.g. referral agreement, co-marketing, integration, white-label, revenue share}
- Decision-maker at the partner company: {decision_maker_role}
- Any existing relationship with them: {existing_relationship_or_none}

Build a partnership proposal that includes:

1. Executive summary: the opportunity in 3 sentences
2. Why us + why them: the strategic fit from both sides
3. Partnership model details: exactly how it works, what each party does
4. Value exchange: what each party gets (be specific – revenue, leads, reach, capabilities)
5. Go-to-market plan: how we launch and promote the partnership together
6. Success metrics: how we'll both measure whether it's working
7. Proposed terms: high-level commercial framework (to be refined in negotiation)
8. Next steps: clear proposed actions to move forward

Also provide:

- A shorter outreach email to propose the partnership initially
- 3 objections they might raise and how to respond

Why it works: Most partnership proposals fail because they focus on what the proposer wants. This framework leads with mutual value — making it easy for the partner to say yes.

Prompt 10: The Exit & Succession Planning Framework

Title: *Build to Last (or Sell) — Exit and Succession Planning Framework for Business Owners*

Prompt

You are an expert business exit strategist, M&A advisor, and succession planning consultant. Help me build an exit or succession plan.

Here is the context:

- Business name and type: {business_name_and_type}
- Current annual revenue and profitability: {revenue_and_profit}
- Years in operation: {years_in_operation}
- My role in the business: {your_role}
- Desired exit timeline: {e.g. 2 years, 5 years, no specific timeline}
- Preferred exit type: {e.g. sell to strategic buyer, PE acquisition, management buyout, pass to family, IPO}
- Key dependencies on me personally: {owner_dependencies}
- Current business valuation (if known): {valuation_or_unknown}
- Main goal for exit: {goal – e.g. maximum financial return, legacy preservation, speed, team protection}

Build an exit planning framework that includes:

1. Exit readiness assessment: 10-point scorecard of where you stand today
2. Value drivers to build: what increases your multiple before exit (top 5 levers)
3. Owner dependency reduction plan: how to make the business run without you
4. Financial preparation checklist: clean books, metrics to track, documentation needed
5. Buyer/successor profile: who the ideal acquirer or successor is and where to find them
6. Timeline and milestones: what to do 3 years, 2 years, 1 year, and 6 months before exit
7. Deal structure education: common exit structures explained

(asset sale, share sale, earnout, etc.)

8. Post-exit considerations: tax planning awareness, non-compete implications, identity transition

Also provide: 5 questions to ask a business broker or M&A advisor in your first meeting.

Why it works: The best time to plan your exit is years before you want to leave. A structured framework maximises valuation, reduces dependency risk, and ensures you leave on your terms — not the market's.

End of Category 08: Business Strategy & Planning

Category 09: HR & Recruiting

***10 expert-level prompts** that help you attract top talent, run better interviews, onboard new hires effectively, and build a culture people want to stay in — from job descriptions and offer letters to performance reviews and difficult conversations. Each prompt replaces hours of HR writing and planning work.*

Prompt 1: The Job Description Writer

Title: *Attract the Best, Filter the Rest — Job Description That Draws Top Candidates and Repels Poor Fits*

Prompt

You are an expert talent acquisition specialist and employer branding consultant. Write a compelling job description for me.

Here is the context:

- Role title: {job_title}
- Department and reporting line: {department_and_manager}
- Company name and description: {company_name_and_description}
- Company culture and values: {culture_and_values}
- Key responsibilities (top 5-7): {responsibilities}
- Must-have qualifications: {required_qualifications}
- Nice-to-have qualifications: {preferred_qualifications}
- Compensation range: {salary_range_or_competitive}
- Location and remote policy: {location_and_remote_policy}
- What makes this role exciting: {role_highlights}

Write a job description that includes:

1. Attention-grabbing role headline (not just the title)
2. Company intro: 2-3 sentences that make a great candidate want to work here
3. The opportunity: what this person will own, build, or transform
4. Key responsibilities: written as outcomes, not task lists
5. What we're looking for: must-haves separated from nice-to-haves
6. What's in it for you: benefits, culture, growth – written to attract, not just inform
7. A clear application CTA

Also provide:

- A shortened LinkedIn job post version (max 300 words)
- 3 screening questions to add to the application form
- Inclusive language audit: flag any terms that may deter diverse candidates

Why it works: Most job descriptions read like legal documents. A candidate-centric JD speaks to what great applicants want — autonomy, impact, growth — and filters out poor fits before the first interview.

Prompt 2: The Interview Question Builder

Title: *Interview That Reveals Truth — Structured Interview Guide That Predicts On-the-Job Performance*

Prompt

You are an expert talent assessor and structured interviewing specialist. Build an interview guide for me.

Here is the context:

- Role being hired for: {job_title}
- Key competencies required for success in this role: {competencies}
- e.g. strategic thinking, communication, resilience, technical skills}
- Seniority level: {junior/mid/senior/leadership}
- Interview format: {e.g. 1:1, panel, 30/60/90 minute}
- Biggest hiring mistakes to avoid for this role: {common_hiring_mistakes}
- Company values to assess for: {company_values}

Build a structured interview guide with:

1. Interview structure overview (sections and time allocation)
2. Opening script: how to welcome and frame the interview
3. Behavioural questions (STAR format): 2-3 questions per key competency
4. Situational/hypothetical questions: 2-3 scenarios relevant to the role
5. Culture and values questions: 3 questions to assess alignment
6. Role-specific technical or skills questions (if applicable): 2-3 questions
7. Candidate questions section: 3 questions great candidates always ask (and what to listen for)
8. Closing script: how to end the interview and set expectations
9. Scoring rubric: 1-5 scale with behavioural anchors for each competency

Also provide: red flags to watch for in answers and a candidate comparison scorecard template.

Why it works: Unstructured interviews are little better than gut feel. Structured, competency-based interviews with scoring rubrics dramatically improve hiring accuracy and reduce bias.

Prompt 3: The Job Offer Letter Writer

Title: *Close the Candidate — Offer Letter That Excites, Clarifies, and Gets a Fast Yes*

Prompt

You are an expert HR professional and talent acquisition specialist. Write a job offer letter for me.

Here is the context:

- Candidate name: {candidate_name}
- Role title: {job_title}
- Department: {department}
- Reporting to: {manager_name_and_title}
- Start date: {start_date}
- Employment type: {full-time/part-time/contract}
- Compensation: {salary_or_rate}
- Bonus structure (if any): {bonus_details}
- Benefits summary: {key_benefits}
- Location and remote policy: {location_policy}
- Offer expiry date: {offer_expiry}
- Company name and signatory: {company_name_and_signatory}
- Tone: {warm and professional/formal/startup-casual}

Write a complete offer letter that includes:

1. Warm, enthusiastic opening that makes them feel chosen (not processed)
2. Role details: title, start date, reporting structure, location
3. Compensation package: base, bonus, equity (if any), benefits summary
4. Employment conditions: type, probation period (if applicable), at-will clause (if applicable)
5. Next steps: what they need to do to accept and what happens after
6. Warm closing that reinforces excitement about them joining

Also provide:

- A shorter verbal offer script to use on the phone before sending the letter
- A follow-up email template if they haven't responded by Day 3

Why it works: The offer letter is the last sales document in your hiring process. A warm, clear, well-structured letter reduces time-to-accept and prevents candidates from using it to shop competing offers.

Prompt 4: The Employee Onboarding Plan

Title: *First 90 Days Done Right — Onboarding Plan That Ramps New Hires Faster and Reduces Early Churn*

Prompt

You are an expert HR and people operations specialist. Build a 90-day onboarding plan for a new hire.

Here is the context:

- Role: {job_title}
- Department: {department}
- New hire's name: {new_hire_name}
- Manager's name: {manager_name}
- Start date: {start_date}
- Key goals for the role in Year 1: {year_1_goals}
- Key stakeholders they'll work with: {stakeholders}
- Tools and systems they'll need to learn: {tools_and_systems}
- Team size and culture: {team_context}

Build a 90-day onboarding plan with:

Week 1 – Orientation: culture, people, tools, admin

Weeks 2-4 – Learning: processes, systems, key relationships

Month 2 – Contributing: first projects, early wins, feedback loops

Month 3 – Owning: full productivity, independent delivery, 90-day review

For each phase include:

1. Key objectives
2. Specific activities and milestones
3. People to meet (with suggested meeting topics)
4. Resources to review or complete
5. Success criteria: how we'll know they're on track

Also provide:

- A Day 1 checklist (manager-side and new hire-side)
- A 30/60/90-day check-in question template
- Early warning signs that onboarding is going off track

Why it works: 20% of turnover happens within the first 45 days. A structured 90-day onboarding plan reduces early churn, accelerates time-to-productivity, and makes new hires feel set up to succeed.

Prompt 5: The Performance Review Framework

Title: *Reviews That Actually Improve Performance — Review Framework That's Fair, Actionable, and Motivating*

Prompt

You are an expert HR strategist and performance management specialist. Build a performance review framework for me.

Here is the context:

- Company size and stage: {company_size_and_stage}
- Review frequency: {annual/semi-annual/quarterly}
- Role being reviewed: {job_title_or_all_roles}
- Core competencies to assess: {competencies}
- Company values to incorporate: {values}
- Current pain points with reviews: {pain_points – e.g. too vague, managers avoid difficult feedback, no follow-through}
- Goal of the review process: {goal – e.g. development, promotion decisions, compensation, accountability}

Build a performance review framework that includes:

1. Review structure overview and philosophy statement
2. Self-assessment template: 5–7 questions for the employee to complete before the review
3. Manager assessment template: rating rubric (1–5) + written commentary prompts for each competency
4. 360 feedback section (optional): questions for peers and direct reports
5. Goal review section: how to assess progress on previous goals
6. New goal-setting section: how to set SMART goals for the next period
7. Development plan template: strengths to leverage, areas to develop, support required
8. Conversation guide for managers: how to structure the review meeting (opening, feedback, goals, close)
9. Rating calibration guide: what each score level means in behavioural terms

Also provide: a script for delivering difficult performance feedback constructively.

Why it works: Most performance reviews are either avoided or dreaded because they're vague and disconnected from development. A structured framework makes them useful, fair, and worth the time invested.

Prompt 6: The Difficult Conversation Script

Title: *Say the Hard Thing Well — Scripts for Difficult HR Conversations That Preserve Dignity and Drive Change*

Prompt

You are an expert HR business partner and leadership coach specialising in high-stakes workplace conversations. Help me prepare for a difficult conversation.

Here is the context:

- Conversation type: {type – e.g. performance issue, behaviour problem, redundancy, missed promotion, conflict between team members, resignation counter-offer}
- Specific situation: {describe_the_situation}
- The person I'm speaking with: {their_role_and_relationship_to_me}
- Desired outcome of the conversation: {outcome}
- What I'm most worried about in this conversation: {concern}
- My management style/tono: {style – e.g. direct/empathetic/collaborative}

Provide:

1. Preparation checklist: what to clarify, document, and have ready before the meeting
2. Opening statement: how to start the conversation clearly and respectfully
3. Key messages: the 2–3 things I must communicate, written plainly
4. Anticipated reactions and responses: 4–5 likely responses and how to handle each
5. Closing statement: how to end the conversation with clarity on next steps
6. Follow-up: what to document and communicate after the conversation

Also provide:

- Language to avoid (phrases that escalate or undermine the message)

- A 1-page written summary template to send after the conversation for documentation

Why it works: Avoiding difficult conversations costs more than having them.

Preparation transforms dreaded moments into decisive ones — preserving relationships while driving accountability.

Prompt 7: The Employee Engagement Survey Builder

Title: *Hear the Truth — Employee Engagement Survey That Surfaces What's Really Happening in Your Team*

Prompt

You are an expert organisational psychologist and employee engagement specialist. Build an employee engagement survey for me.

Here is the context:

- Company name and size: {company_name_and_size}
- Team or department (if targeting a specific group): {team_or_all_company}
- Current engagement concerns: {concerns – e.g. high turnover, low morale, post-reorganisation uncertainty}
- Topics most important to measure: {topics – e.g. manager effectiveness, workload, career development, culture, recognition}
- Survey format preference: {anonymous/confidential/named}
- How results will be used: {how_results_will_be_used}

Build an engagement survey that includes:

1. Survey introduction: purpose, anonymity assurance, how results will be shared
2. 30–40 questions across these categories:
 - Overall engagement and satisfaction (5 questions)
 - Manager effectiveness (5 questions)
 - Role clarity and workload (5 questions)
 - Career development and growth (5 questions)
 - Team collaboration and culture (5 questions)
 - Recognition and reward (5 questions)
 - Company leadership and direction (5 questions)
 - Open-ended questions for qualitative insight (3–5 questions)
3. Rating scale guidance (e.g. 1–5 Likert scale with labels)
4. Recommended survey length and completion time estimate

5. Communication plan: how to launch the survey and encourage participation

Also provide:

- A results presentation template (how to share findings with the team)
- 5 action planning questions to use after results are shared

Why it works: Engagement surveys only create value if they surface honest data and lead to action. This framework is designed for truth-telling — not vanity metrics.

Prompt 8: The Recruitment Marketing Campaign

Title: *Talent Magnet — Employer Brand Campaign That Makes Top Candidates Come to You*

Prompt

You are an expert employer branding and recruitment marketing specialist. Build a recruitment marketing campaign for me.

Here is the context:

- Company name: {company_name}
- Roles currently hiring for: {open_roles}
- Target candidate profile: {ideal_candidate – background, values, motivations}
- Key reasons to work here (honest, specific): {evp – employee value proposition}
- Company culture highlights: {culture_highlights}
- Channels available: {channels – e.g. LinkedIn, Instagram, job boards, employee referrals, campus}
- Budget: {budget_or_organic_only}
- Hiring urgency: {timeline}

Build a recruitment marketing campaign that includes:

1. Employer Value Proposition (EVP) statement: why top talent should choose you (honest, differentiated)
2. Campaign concept and theme: a unifying idea across all content
3. Content plan: 8-10 pieces of recruitment content with format, platform, and message for each
 - Employee spotlight posts
 - Day-in-the-life content

- Culture/values posts
 - Behind-the-scenes content
 - Role-specific posts
4. LinkedIn company page optimisation checklist
 5. Employee referral programme: how to structure and incentivise it
 6. Job board optimisation tips: titles, descriptions, and keywords for each open role
 7. Candidate experience audit: 5 touchpoints to improve from application to offer
- Also provide: a 30-day posting schedule across all channels.

Why it works: The best candidates are passive — they're not scrolling job boards, they're being courted. An employer brand campaign puts you in front of them before they're even looking.

Prompt 9: The HR Policy Writer

Title: *Policies People Actually Read — Clear, Fair HR Policies That Protect the Business and Respect Employees*

Prompt

You are an expert HR policy writer and employment law generalist. Help me write an HR policy.

Here is the context:

- Policy type: {e.g. remote work policy/PTO policy/code of conduct/anti-harassment policy/social media policy/expenses policy}
- Company name: {company_name}
- Company size and location/jurisdiction: {size_and_location}
- Key behaviours or situations this policy needs to address: {key_scenarios}
- Tone preference: {formal/clear and accessible/startup-friendly}
- Any specific rules or limits to include: {specific_rules}
- Who this policy applies to: {all employees/specific roles/contractors}

Write a complete HR policy that includes:

1. Policy title and version date
2. Purpose statement: why this policy exists (in plain language)
3. Scope: who it applies to

4. Policy details: clear rules, entitlements, and procedures (use numbered sections and plain language)
5. Manager responsibilities: what managers must do
6. Employee responsibilities: what employees must do
7. Non-compliance consequences: stated clearly but fairly
8. How to ask questions or raise concerns
9. Review date and policy owner

Also provide:

- A plain-English summary (for onboarding packs or intranet)
- 3 FAQs employees are likely to ask about this policy
- A manager briefing note on how to communicate the policy to their teams

Why it works: Poorly written policies either go unread or create confusion and legal risk. Clear, accessible policies set expectations, protect the business, and show employees they're treated as adults.

Prompt 10: The Redundancy & Offboarding Script

Title: *End With Integrity — Redundancy and Offboarding Process That's Humane, Legal, and Protects Your Reputation*

Prompt

You are an expert HR business partner with deep experience in workforce restructuring and employee offboarding. Help me manage a redundancy or departure with integrity.

Here is the context:

- Situation type: {redundancy/resignation/performance exit/end of contract}
- Number of people affected: {number}
- Reason (for internal clarity): {reason}
- Notice period required: {notice_period}
- Severance or entitlements: {severance_details}
- Remaining team context:
{how_the_rest_of_the_team_will_be_affected}
- Company jurisdiction/location: {location – for legal context}
- Desired tone: {compassionate/professional/direct}

Provide a complete offboarding framework that includes:

1. Pre-conversation checklist: what HR and legal need to approve before the meeting
2. Redundancy notification script: word-for-word opening and key messages
3. Frequently asked questions the employee will likely ask – and honest, compassionate answers
4. Severance and entitlements explanation template
5. Knowledge transfer plan: how to capture critical information before departure
6. Systems and access offboarding checklist
7. Communication plan: how to tell the remaining team (what to say, what not to say)
8. Reference policy guidance: what managers can and cannot say
9. Alumni relationship strategy: how to part on good terms (exit survey, alumni network, LinkedIn endorsement)

Also provide:

- A letter of redundancy template
- A remaining team FAQ document to pre-empt gossip and anxiety

Why it works: How a company handles exits is watched closely by everyone who stays. A humane, well-managed offboarding process protects your employer brand, reduces legal risk, and preserves dignity for everyone involved.

End of Category 09: HR & Recruiting

Category 10: Product Development

10 expert-level prompts that help you ideate, validate, build, and launch better products — from user research and feature prioritisation to roadmap planning, sprint management, and post-launch iteration. Each prompt replaces hours of product thinking, documentation, and stakeholder communication work.

Prompt 1: The Product Requirements Document (PRD)

Writer

Title: *Build the Right Thing — PRD That Aligns Engineering, Design, and Business Before a Line of Code Is Written*

Prompt

You are an expert product manager with experience writing clear, actionable product requirements documents. Write a PRD for me.

Here is the context:

- Product or feature name: {product_or_feature_name}
- Problem it solves: {problem_statement}
- Target user: {target_user}
- Business goal it supports: {business_goal}
- Success metrics: {how_we_measure_success}
- Scope (what's in and out): {in_scope_and_out_of_scope}
- Key constraints: {constraints – time, budget, technical, regulatory}
- Stakeholders: {stakeholders – engineering, design, marketing, legal}
- Launch timeline: {target_date_or_quarter}

Write a complete PRD that includes:

1. Executive summary: problem, solution, and why now (1 page max)
2. Background and context: user research findings, market opportunity, strategic fit
3. Goals and success metrics: primary KPIs and guardrail metrics
4. User stories: written in "As a [user], I want to [action] so that [outcome]" format (8–12 stories)
5. Functional requirements: detailed feature specifications, numbered and prioritised (MoSCoW)
6. Non-functional requirements: performance, security, scalability, accessibility
7. UX/design requirements: key flows, edge cases, accessibility standards
8. Out of scope: explicit list of what this release does NOT include
9. Open questions and decisions needed
10. Dependencies and risks

Also provide: a one-pager executive summary version for leadership review.

Why it works: Ambiguous requirements are the leading cause of missed deadlines and wrong products. A rigorous PRD eliminates interpretation gaps before they become expensive rework.

Prompt 2: The User Research Interview Guide

Title: *Listen to Learn — User Research Interview Guide That Uncovers Real Needs, Not Stated Ones*

Prompt

You are an expert UX researcher and product strategist. Build a user research interview guide for me.

Here is the context:

- Product or feature being researched: {product_or_feature}
- Research objective: {what_you_want_to_learn}
- Target participant profile: {user_profile}
- Number of interviews planned: {number}
- Interview format: {moderated/unmoderated, remote/in-person}
- Key hypotheses to validate or invalidate: {hypotheses}
- Stage of development: {discovery/validation/usability testing}

Build a research guide that includes:

1. Research objectives (3-5 specific questions this research will answer)
2. Screener criteria: how to qualify the right participants
3. Interview structure and timing (e.g. 60-minute session breakdown)
4. Warm-up questions: 3-5 questions to build rapport and context
5. Core discovery questions: 10-15 open-ended questions that avoid leading the participant
6. Probing techniques: follow-up prompts to go deeper ("tell me more", "what did you mean by...")
7. Prototype or concept reaction questions (if applicable)
8. Wrap-up questions: what else should we know, who else should we talk to
9. Observer notes template: what to capture during and after each session
10. Affinity mapping guide: how to synthesise findings across interviews

Also provide:

- A participant recruitment message template
- 5 interviewer mistakes to avoid in user research

Why it works: Users don't know what they want — but they know what frustrates them. The right questions, asked the right way, reveal problems worth solving that no survey ever could.

Prompt 3: The Feature Prioritisation Framework

Title: *Build What Matters — Feature Prioritisation Framework That Cuts Through Opinion and Focuses the Roadmap*

Prompt

You are an expert product manager specialising in roadmap strategy and feature prioritisation. Help me prioritise my product backlog.

Here is the context:

- Product name and stage: {product_name_and_stage}
- Current feature backlog (list them): {feature_list}
- Business goals for the next quarter: {quarterly_goals}
- Key user segments and their top needs: {user_segments_and_needs}
- Engineering capacity (rough): {capacity – e.g. 2 engineers for 12 weeks}
- Non-negotiable constraints: {constraints – e.g. compliance deadline, platform dependency}
- Stakeholder priorities (what leadership is pushing): {stakeholder_pressure}

Apply 2 prioritisation frameworks and compare:

Framework 1 – RICE Scoring:

Score each feature on: $\text{Reach} \times \text{Impact} \times \text{Confidence} \div \text{Effort}$

Provide scores and ranked list.

Framework 2 – Value vs Effort Matrix:

Plot each feature into: Quick Wins / Big Bets / Fill-Ins / Money Pit

Provide a categorised list.

Then provide:

1. Recommended top 5 features to build next, with rationale

2. Features to defer and why
3. Features to kill and why (be direct)
4. Dependencies map: which features must come before others
5. A narrative roadmap summary for stakeholder communication (no jargon)

Also provide: a one-page roadmap visual description (table format) for the next two quarters.

Why it works: Prioritisation fights are won by whoever has the loudest opinion — unless there's a framework. Scoring and matrices replace politics with data.

Prompt 4: The Sprint Planning Document

Title: *Ship Faster — Sprint Planning Document That Keeps Engineering Focused and on Track*

Prompt

You are an expert agile product manager and scrum master. Help me plan a productive sprint.

Here is the context:

- Sprint number and dates: {sprint_number_and_dates}
- Sprint goal (the one thing this sprint must achieve): {sprint_goal}
- Team members and roles: {team_and_roles}
- Velocity from last sprint: {velocity_or_estimated_capacity}
- Stories from the backlog to include (list them): {candidate_stories}
- Any carry-over from last sprint: {carry_over}
- Known risks or blockers going into the sprint: {risks_and_blockers}
- Dependencies on other teams: {dependencies}

Produce a sprint planning document that includes:

1. Sprint goal statement (clear, inspiring, testable)
2. Committed user stories with: story description, acceptance criteria, story point estimate, assigned owner
3. Stretch stories: additional items if capacity allows
4. Capacity plan: available hours per team member accounting for meetings, holidays, support duties

5. Definition of Done checklist (applied to all stories)
6. Risk log: known risks with likelihood, impact, and mitigation
7. Daily standup format: 3-question template for the team
8. Sprint review agenda: how to demo and gather feedback at sprint end
9. Retrospective prompts: 3 questions for what went well, what to improve, what to try

Also provide: a stakeholder update template to send at sprint kick-off.

Why it works: Poorly planned sprints create chaos mid-week. A structured sprint plan creates shared commitment, surfaces blockers early, and gives stakeholders predictability.

Prompt 5: The Product Launch Checklist & Plan

Title: *Launch Without the Fire Drill — Product Launch Plan That Aligns Every Team and Delights Early Users*

Prompt

You are an expert product launch strategist with experience coordinating cross-functional launches. Build a product launch plan for me.

Here is the context:

- Product or feature being launched: {product_or_feature}
- Target launch date: {launch_date}
- Launch type: {soft launch/beta/general availability/major release}
- Target users for initial launch: {initial_audience}
- Key launch goals: {goals – e.g. signups, activations, press coverage, revenue}
- Teams involved: {engineering, marketing, sales, support, legal, design}
- Known risks: {risks}

Build a launch plan that includes:

1. Launch goals and success metrics (with targets)
2. Pre-launch checklist (T-minus 4 weeks, 2 weeks, 1 week, 48 hours, launch day)

3. Team responsibilities matrix: who owns what across each department
4. Go/no-go criteria: the conditions that must be true before we launch
5. Communication plan:
 - Internal: how to brief the team and sales/support
 - External: PR, email, social, in-product messaging
6. Early access / beta programme plan (if applicable)
7. Support readiness: FAQs, known issues, escalation process
8. Launch day war room: who's on call, how to communicate issues, rollback plan
9. Post-launch review: what to measure in the first 7 and 30 days

Also provide: a launch announcement email and in-app message template.

Why it works: Most launches fail not because the product is bad, but because the coordination breaks down. A launch plan with clear ownership and a go/no-go gate prevents preventable failures.

Prompt 6: The User Persona Builder

Title: *Know Your User — Research-Backed Personas That Anchor Every Product Decision in Real Human Needs*

Prompt

You are an expert UX researcher and product strategist. Help me build detailed user personas for my product.

Here is the context:

- Product or service: {product_or_service}
- Known user segments (from data, interviews, or assumption): {user_segments}
- Key data available (surveys, analytics, interviews): {data_available_or_none}
- Main jobs-to-be-done your product addresses: {jobs_to_be_done}
- Biggest user pain points you're aware of: {pain_points}
- Number of personas needed: {2-4}

For each persona, build a complete profile including:

1. Name, photo description, and one-line summary

2. Demographics: age range, role/occupation, location, tech comfort level
3. Goals: what they're trying to achieve (professionally and personally)
4. Frustrations: what makes their job or life harder
5. Behaviours: how they currently solve the problem (before your product)
6. Motivations: what drives their decisions and priorities
7. A day in their life: a brief narrative of their typical day
8. How they discover and evaluate solutions like yours
9. Quote: a representative thing they might say about their problem
10. Product implications: what this persona most needs from your product

Also provide:

- A persona priority ranking (primary, secondary, tertiary)
- A "persona anti-pattern": who you are NOT building for and why

Why it works: Features built without a clear user in mind get debated in meeting rooms and deleted after launch. Personas make the user present in every product conversation.

Prompt 7: The Competitive Product Analysis

Title: *Know the Battlefield — Competitive Product Analysis That Reveals Where to Win and What to Avoid*

Prompt

You are an expert product strategist and competitive intelligence analyst. Help me conduct a thorough competitive product analysis.

Here is the context:

- My product: {your_product_name_and_description}
- Target user: {target_user}
- Competitors to analyse: {competitor_1}, {competitor_2}, {competitor_3}, {competitor_4}
- Features most important to compare: {key_feature_areas}
- My current product strengths: {your_strengths}
- My current product weaknesses: {your_weaknesses}
- Strategic question I'm trying to answer: {e.g. where should we invest next / how do we differentiate / should we enter this market}

Produce a competitive analysis that includes:

1. Competitor overview: for each competitor – positioning, target user, pricing model, key differentiator
2. Feature comparison matrix: side-by-side table of key features (yours vs each competitor)
3. UX and onboarding assessment: how each product handles first-time user experience
4. Pricing and packaging comparison
5. Strengths and weaknesses of each competitor (honest assessment)
6. Where each competitor is investing (based on recent releases, job postings, announcements)
7. Gap analysis: unmet user needs that no competitor addresses well
8. Differentiation recommendations: 3 areas where you can build a defensible advantage
9. Features to skip: capabilities competitors have that don't drive real user value

Present as a competitive intelligence report with strategic recommendations.

Why it works: Building without competitive context means reinventing what others have already learned — or ignoring the gaps where you could win. This analysis converts market intelligence into product decisions.

Prompt 8: The Product Metrics & KPI Framework

Title: *Measure What Matters — Product Metrics Framework That Connects Features to Business Outcomes*

Prompt

You are an expert product analytics strategist and growth specialist. Help me build a product metrics framework.

Here is the context:

- Product type: {e.g. SaaS/marketplace/mobile app/e-commerce/B2B tool}
- Stage: {early/growth/mature}
- Primary business goal: {goal – e.g. grow revenue, reduce churn, increase activation, improve retention}
- Current metrics tracked (if any): {current_metrics_or_none}

- Key user actions in the product: {core_user_actions}
- Current biggest product problem: {problem}

Build a product metrics framework that includes:

1. North Star Metric: the one metric that best captures the value your product delivers to users
2. Input metrics: the 3-5 leading indicators that drive the North Star
3. Health metrics: guardrails that tell you if something is going wrong (retention, churn, NPS, error rates)
4. Funnel metrics: acquisition → activation → engagement → retention → revenue (AARRR), with specific metric for each stage
5. Feature-level metrics: how to measure the success of individual features
6. Experiment metrics: primary metric and guardrail metrics for A/B tests
7. Dashboard recommendation: what to review daily, weekly, and monthly – and who owns each
8. Metric definitions: exact calculation method for each key metric (prevent inconsistency)
9. Baseline benchmarks: industry benchmarks to compare against for your product type

Also provide: a metric review meeting agenda template (weekly product review format).

Why it works: Teams that track everything focus on nothing. A metrics framework creates a hierarchy of attention — ensuring decisions are made against the metrics that actually matter.

Prompt 9: The Beta Testing Programme Builder

Title: *Test With Intent — Beta Programme That Generates Actionable Feedback Before Full Launch*

Prompt

You are an expert product manager and user research specialist. Help me design a beta testing programme.

Here is the context:

- Product or feature going into beta: {product_or_feature}

- Beta goals: {goals – e.g. validate usability, stress test infrastructure, gather NPS, find critical bugs}
- Target beta user profile: {beta_user_profile}
- Number of beta users: {target_number}
- Beta duration: {e.g. 4 weeks, 8 weeks}
- What beta users will get access to: {access_level}
- Incentive for beta participants (if any): {incentive}
- Internal team responsible: {team}

Design a beta programme that includes:

1. Beta objectives: 3–5 specific questions this beta will answer
2. Recruitment plan: how to find, screen, and invite the right beta users
3. Beta welcome email and onboarding sequence (3 emails)
4. Feedback collection methods: in-app surveys, weekly check-in emails, user interviews, usage analytics
5. Feedback questions: 10 structured questions + 2 open-ended questions for weekly check-ins
6. Bug reporting process: how beta users should report issues
7. Community channel recommendation: how to keep beta users engaged and talking to each other
8. Success criteria: what findings would mean the product is ready for full launch
9. Go/no-go decision framework: how to decide whether to launch, iterate, or delay
10. Beta-to-launch transition: how to convert beta users into advocates at launch

Also provide: a beta participant NPS survey template and a closing thank-you email.

Why it works: Unstructured betas generate noise. A designed beta programme generates signal — specific, actionable feedback that reduces launch risk and builds a community of early advocates.

Prompt 10: The Post-Launch Retrospective & Iteration Plan

Title: *Launch Is Just the Beginning — Post-Launch Retro That Turns Learnings Into a Better Next Version*

Prompt

You are an expert product manager and continuous improvement facilitator. Help me run a post-launch retrospective and build an iteration plan.

Here is the context:

- Product or feature launched: {product_or_feature}
- Launch date: {launch_date}
- Original launch goals: {original_goals}
- Actual results (metrics): {actual_results}
- What went well: {wins}
- What didn't go as planned: {problems}
- Key user feedback received since launch: {user_feedback}
- Team feedback: {team_feedback}
- Next planned release date: {next_release_date}

Produce a post-launch retrospective document that includes:

1. Launch scorecard: goals vs actuals for each success metric
2. What we got right: 5 specific wins and why they worked
3. What we got wrong: 5 specific failures or misses with root cause analysis
4. What surprised us: unexpected outcomes (positive and negative)
5. User feedback synthesis: top 5 themes from user feedback with representative quotes
6. Process retrospective: what went well and what to improve in how we built and launched
7. Iteration backlog: top 10 improvements prioritised by impact based on launch learnings
8. v2 north star: what the next version should achieve based on what we've learned
9. Team recognition: specific callouts for individuals who made the launch happen

Close with:

- 3 commitments the team is making for the next launch cycle
- One process change to implement immediately

Format as a retrospective document suitable for sharing with the full team and leadership.

Why it works: Teams that don't retrospect repeat the same mistakes. A structured post-launch retro closes the loop between what was planned and what happened — making every subsequent product cycle smarter.

Thank You!

Thank you for purchasing! *This product is updated monthly with new prompts.*

Stay tuned for new categories, bonus prompt packs, and advanced variations — all included with your purchase at no extra cost.
